

SILVAT

For Your cooking

2023year

Silvat

Edit. Vol 8

Company philosophy

Silvat Co., LTD., We are committed to provide best quality products to our customers to make their life better. We've produced aluminum cookware with various coatings since 1996.

We are proud that we are the first company which can process ceramic coating, nonstick coating and hard anodizing at the same time in Korea.

Upon developing the own technologies based on our idea, that product could be completed by engineer, not machine itself. Then in result, we are succeeding to create own product lines with good color and nice design with texture touching and expression.

For much happier time, not for just simple meal and cook, we are trying to make up ours into better ways. Wish that you are happy while cooking with our frying pan and pot.

Silvat

Company footprint

- 1996 - Founded Company in Busan (Fine art co.,ltd)
- 1998 - Chicago Exhibition applied
Gold coating pot developed
- 2000 – Factory Location Shift to Gimhae
- 2002 - Dual tone color pot development
- 2004 - Gravity Casting Pot development
- 2006 - Living Castle – Brand Registration
Transfer paper (decal) skill license
- 2008 - SCT Design pot development
Acquire ISO 9001, ISO 14001 and Q mark
- 2011 – Company expanded to new factory
Name changed to Silvat Co.,Ltd
Overseas Sales Division Set Up
- 2012 - Trade Mark - Russia
Trade Mark - China
- 2014 - Trade Mark – Taiwan & Viet Nam
- 2018 - Hit Product of GS Home shopping 2 year
with Wooden IH Frying pan
- 2020 - Online biz team set up
- 2021 - Open new warehouse for online distribution
- 2022 - Trade Mark – Hong Kong
Over 1 Million USD export award

Silvat

Company Facilities

- Location

Gimhae, South Korea
(within 30km to airport/seaport)

- Business

Aluminum Cookware (Fry pan & Pot)

- Area Space

Factory: 2,000 square meter
Warehouse: 2,000 square meter

- Facilities

3,500Ton Forged Press Machine – 1 unit
200Ton Hydraulic press – 1 unit
170Ton Hydraulic press - 2 unit
60 Ton Mechanical press - 1unit
10Ton Power press - 1unit
6 whole Welding machine - 1unit
3 whole auto-sanding machine – 3 unit
1whole semi-sanding machine – 1 unit
Auto spray coating booth - 3unit
Convection drying rail - 6 unit
Hard anodizing pool

Company Advantage

Forged type pan is made by 3,500 tons of forging machine with high pure material (97%) With its high power of forging process, aluminum molecular system is more dense and excellent for thermal conductivity, corrosion resistance and abrasion resistance

Hard anodized surface is 2 times harder than stainless steel. It's allow to use metal utensil and use for life time. Hard anodizing is strong for abrasion resistance and corrosion resistance.

Nonstick coating is a surface engineered to reduce ability of other material stick to it. Nonstick coating is applied to substrate to produce a non-stick surface **without PFOA** which known as hazardous chemical

Patented STC Printing & Decal Printing

We can express various patterns on the body to make differentiate from other products. Exterior with diverse colored patterns which attract customers.

Specification

Size: Wok pan – 20 / 24 / 28 / 30 / 32 cm
 Frying pan – 20 / 26 / 28 / 30 cm

Model: Absolute IH frying pan / Wok pan
 Material Information
 Body: Aluminum alloy
 Inner Coating: Xlyan (Fluoride)
 Outer Coating: Heat register paint
 Flame guard: Stainless
 Handle: Bakelite(ABS)
 Package: color box in Master Carton
 Country of Origin: Korea
 Manufacturer: Silvat co.,Ltd

Product Advantage

◎ Forged Treatment

With 97% premium aluminum alloy, It was forged by 3500ton pressure. So, It is strong for outside heat and shock while cooking

◎ Stud Handle

Handle connection is arranged stud welding spot, so, there is no food remains between handle and body. Your cooking will be hygienic. Ergonomic design handle is just added for you.

◎ Heat Register Paint

Beautiful pattern and color will not be changed by heat and shocked since painted excellent heat registered coverage. Your cooking will be long lasting always with those.

◎ Excellent non stick

Because of high pure quality aluminum alloy and Xlyan coating are harmonized well, non stock will be much powerful on cooking

Silvat

Product Advantage

◎ Natural Embossing

Even excellent non stick coating, we added Embossing effect call as oil road on the body. Since engraved embossing was come from mountain tree surface, It has natural performance for steak cooking or other else.

◎150% Wider bottom

Since Bottom is 50% wider, it works well on the induction plate. Your energy can be saved much. And more food can be cooked in same time. Save your time and effort with Silvat

◎ Premium Aluminum

It is a product using only high purity aluminum plate of over 97%. There is almost no micro processing , so coating can be long lasting than other makers because no micro hole on the body structure. So, corrosion does not occur easily after cooking time to time.

Model: Wooden IH frying pan / wok pan

Material Information

Body: Aluminum alloy

Inner Coating: Black Fluoride

Outer Coating: Black Ceramic

Flame guard: Aluminium

Handle: Bakelite(ABS)

Package: bulk 10 pcs in Master Carton

Country of Origin: Korea

Manufacturer: Silvat co.,Ltd

Product Advantage

◎ Best Seller Item over the world

It was sold out over 100 million China , USA, Canada , Hong Kong and Korea . Since it was first featured on TV home shopping, million user told that it is perfect. Class pan is legend.

◎ Pressed Treatment

With 97% premium aluminum alloy, It is enough strong for outside heat and shock while cooking like deforming effect or twisted

◎ First oil road of Silvat

Unspecified pattern oil road makes well organized non stick effect on the pan. While cooking , you can cook with less oil for family healthy for egg, steak, and fish, whatever.

◎ Wooden effect Handle and stud welding

Handle connection is arranged stud welding spot, so, there is no food remains between handle and body. Your cooking will be hygienic. Ergonomic design handle is just added for you.

Made without PFOA

Oil road internal texture method

It can be used without worrying about food sticking by making the part that comes into contact with food smaller with the internal texture

Eco-friendly ceramic coating
Strong corrosion resistance
and safe to use

01

present of nature

FREE PFOA
FREE LEAD
FREE TOXIC
FREE HEAVY METAL

02

Soft touch handles

It has excellent grip and is designed to prevent the handle from coming into contact with fire, making it convenient to use.

03

Stud Welding Connect

With smooth connection by elding spot, it is hygiene af dish cleaning

04

Available for Induction

you can apply on ceramic heater, hot plate, gas and electric Induction as well. you can cook everywhere.

CUPIDO IH POT

The deep blue color stands out with an edge in a pretty jar mold. Strong stain resistance and easy cleaning. It is harmless and safe ceramic pot.

Name	Specification	Item	Size
Cupido IH Pot	Aluminium, Stainless Steel	18cm Casserole	
	Bakelite, Glass	18cm Pot	
		22cm Pot	
Method	Pressing		
Coating	Inner : Ceramic		
	Outer : Fluoride		
Rivet	Stud Welding		

Made without PFOA

Ingredients derived from highly purified natural minerals It is environmentally friendly and does not generate harmful ingredients during cooking. It is resistant to scratches and heat and is not easily deformed.

Premium Aluminium Plate

It is a product using only high-purity aluminum plate of 97% or more, and there is almost no micro-processing and the structure is hard, so whitening or corrosion does not occur easily.

PREMIUM

FREE PFOA FREE LEAD FREE TOXIC FREE HEAVY METAL

Forged Method

The thickness of the bottom and flange is increased to prevent warping, and the density is increased by the forging method to resist impact.

02 Hard Anodizing Treatment

As it is a natural film treatment method, there is no fear of the coating peeling off, so it is semi-permanent and Eco-friendly and harmless to human body.

SCT Pattern Design

The SCT pattern design applied with Silvat's technology that is not easily scorched or polluted with fire will create a luxurious kitchen.

04 Flange Method

It is convenient to use with the flange method that can pour food cleanly without external contamination.

Non Over flow function

A knob with steam discharge function is applied to minimize overflow. Safe to use.

Absolute IH Pot

By using the forging pressing method, the density of aluminum is made dense so that it does not corrode. It reduces the whitening phenomenon and enhances the taste during cooking. In addition, it can be used semi-permanently because it is hard anodized inside.

Specification

Name Absolute IH Pot
