

Hue Obsess
Introduction

HUE OBSESS, a new brand of Hue Foret Cosmetics, is the first to apply Obsess, developed with electron beam cross linked technology at the Korea Atomic Energy Research Institute.

OBSESS has higher moisturizing and moisture absorption power than conventional substances. It is known not only to have strong moisturizing power to absorb moisture by 3,000 to 5,000 times its own mass but also to produce higher levels of pyrrolidone carboxylic acid (PCA) and urocanic acid (UA), which are natural moisturizing factors (NMFs) in the stratum corneum.

Obsess Fill

Obsess Well

OBSESS is one of the amino acids of the living body and is a biodegradable material without any chemical ingredients. It is a natural polymer material widely used in medicine and cosmetics.
