

REAL  EMS

The Most Perfect Low-Frequency Device

# REAL EMS

Anytime! Anywhere! Anybody!  
The perfect EMS trainer!  
Introducing the REAL EMS

## ***Anytime! Anywhere! Anybody!***

At ION INTERNATIONAL Co., Ltd. we are a leading manufacturer and provider of innovative EMS (Electrical Muscle Stimulation) devices. Our mission is to revolutionize the fitness industry by offering cutting-edge solutions that can be used anytime, anywhere, and by anyone. With a strong focus on quality and effectiveness, our EMS devices are designed to deliver exceptional results in a convenient and accessible manner.

We understand that traditional EMS training can be costly and requires specialized facilities. That's why we have dedicated ourselves to developing advanced EMS trainers that are affordable, portable, and can be easily used by individuals in the comfort of their own homes. Our range of products showcases the pinnacle of EMS technology and functionality. Experience the convenience, effectiveness, and versatility of our EMS trainers.

## Introducing the REAL EMS

### 01 *Champion Belt*

- This high-performance workout belt securely reduces body fat, especially around the abdomen.
- It features a skin lifting effect for a toned physique.
- Clinically tested for effectiveness in abdominal and back workouts.

### 02 *Knee Massager*

- Our knee massager, ideal for daily wear, doubles as a supportive knee protector.
- It pairs with a controller for therapeutic kneading and massage, aiding muscle relaxation and recovery.
- Includes a muscle mode that activates knee muscles for efficient exercise.

### 03 *Shoulder Massager*

- For individuals struggling with poor posture and chronic back pain, our shoulder massager offers a rejuvenating solution.
- It provides deep stimulation to the shoulder muscles, relieving tension and promoting muscle relaxation.
- With its user-friendly design, you can easily massage and exercise your shoulder muscles, enhancing overall well-being.

### 04 *Perfect Hip*

- Our innovative EMS solution for the hips offers a holistic approach to hip care and enhancement.
- From gentle massages to intensive sculpting, our Perfect Hip device helps you achieve your desired physique.
- Whether you aspire to attain apple-shaped hips or improve muscle tone, our product combines a soft and powerful EMS effect with a comfortable design that wraps around your glutes.

### 05 *All-In-One Pad*

- Our intelligent EMS All-In-One Pad revolutionizes the way muscles are trained.
- It supports and enhances muscle contraction and relaxation movements, providing a comprehensive workout experience.
- The microcurrents emitted by our EMS device directly stimulate the targeted muscles, delivering exceptional results without the need for additional equipment such as dumbbells.

### 06 *Hand Massager*

- Achieve enhanced arm strength with better results using less load, emphasizing efficiency and endurance.
- Stimulate blood flow to improve circulation, preventing strain and joint injuries for a safer workout.
- Experience reduced soreness and faster recovery with our targeted post-workout arm massage.

## Training therapy was used by NASA astronauts to prevent muscle loss

EMS, short for Electrical Muscle Stimulation, has been a training method since the 1960s, initially used by astronauts to prevent muscle damage. It employs micro electrical waves to directly stimulate muscles.

The EMS technique involves using 1 to 100 Hz microcurrents to mimic the brain's signals to muscles during body movement, thereby relieving muscle contraction through direct stimulation and activation.

### EMS

The EMS gives the direct stimulation to the muscles, so the muscular exercises are available in more comfortable way

### General

The muscle moves by getting the electrical stimulation from the brain

## ***Faster and better compared to the other exercises! The most efficient exercise method***

The EMS training gives smooth stimulation to the muscle and it strengthens and develops muscles by transmitting soft pressure to the muscles.

### ***High satisfaction on exercise effects compared to the other exercise***

The biggest characteristic is that, it gives the effective and efficient exercise results in short period of time. That is the reason of why it gets high attentions from the busy people and elite sports players

### ***Train the core muscles in an easy way***

Core muscles support the spine and pelvis. In our body, the core muscles are the most important one. From now on, with our EMS devices, you are able to train this important muscle in an easy way

### ***Anybody can use it in an easy way***

You don't have to exercise with heavy dumbbell. With our EMS device, you can easily do the exercises. Therefore, our EMS device is good for the people who have weak bones or muscles. It contains diverse types of modes and they stimulates the inner layer muscles in safe and comfortable way

REAL  EMS

# Champion Belt

- This remarkable belt is the ultimate workout companion. It stays securely in place during exercise and is specifically engineered to reduce body fat percentage, including abdominal fat.
- With a skin lifting effect, it helps you achieve a toned and sculpted physique.
- Our devices have undergone rigorous clinical testing to validate their effectiveness in abdomen and back exercises.

# Differentiated EMS Training

## The Most Perfect Low-Frequency Device

It is not the normal EMS machine which uses the gel pads. It stimulates the muscle directly and we also successfully completed the diverse clinical tests. We provide the After Service (AS) for 2 years from the date of purchase, and since we don't use the gel pads, it does not require maintenance costs.

Therefore, customers highly satisfy on our products for these competitive advantages. Beyond the simple appearance and easy operation method, our REAL EMS is perfectly designed to function as a personal training coach and massager.

POINT

**NO extra maintenance cost**

**Four modes available**

**12 levels of intensity**

**20 Minutes**

**Effective yet efficient**

**User-friendly and simple to operate**

**Powerful and mild EMS low-frequency stimulation**

**EMS low-frequency stimulation targets deep muscles**

**Clinical trial completed**

**Safe REAL EMS**

**2years warranty**

**100% made in korea**

## Various product sizes

- \* Who is in busy for doing the exercises
- \* Who wants a massage from shoulder to knee
- \* Who feels the pain in shoulder, back and knee
- \* Who worries fats around the forearm, thigh, and calf
- \* Who wants to build a perfect hip
- \* Who are lazy for doing the exercises

ION INTERNATIONAL

## REAL EMS VS Normal EMS

### Normal EMS equipment ! What's the problem?

EMS devices have been actively distributed around professional fitness centers for many years. However, these devices have been out of reach for the average consumer. Traditional EMS equipment is expensive and often include high maintenance costs, safety concerns, and quality issues.

We are here to change all of that. REAL EMS offers a diverse set of models that are affordable, safe, and easy to use. With our devices, high quality is guaranteed!

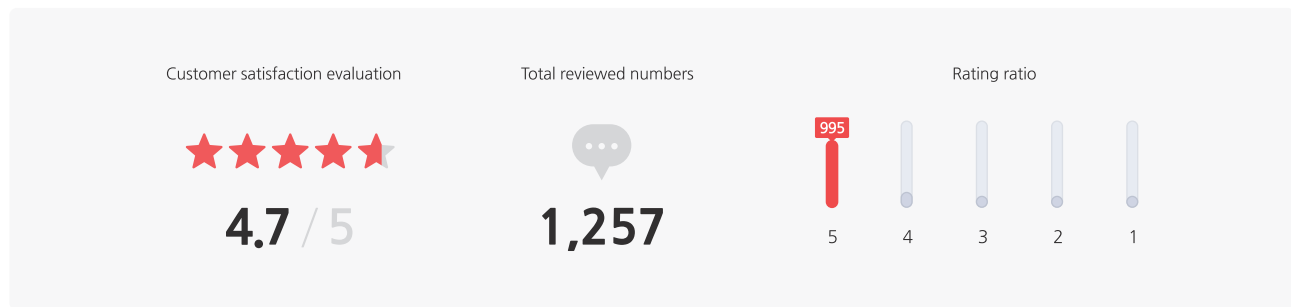

REAL EMS		Normal EMS	
	Only watering on pads is OK!	 Maintenance cost	Repurchase of the gel pads (Require 20-30 USD monthly)
	Acquired safety certification FDA, CE, KC, FCC, TCCS	 Safety	No certification related to safety
	4 types of modes are available. Utilize the guaranteed 10 ~ 80 Hz of frequency wavelength	 Exercise modes	Diverse exercises modes are not available and the intensities are not clearly different
	Able to control the intensity by 12 stages	 Stimulus strength	Low power comes out so less stimulative
	The area of pads are wide enough to deliver the stimulations	 Stimulus range	The area of pads are not wide, less stimulation on muscle
	Undetected from heavy metal test Got high grades from 6 types of fabric tests	 Quality	Most of them are made in foreign countries
	Able to do quick wash where the parts is polluted	 Availability	Once you wash the devices, of washing the functioning skills drop
	Partial repair is available 2 years of warranty period	 A/S	Unable to do the partial repairs when there are defects

## Introduction of Controllers

### We use guaranteed 10-80 Hz of frequency wavelength

The controller is compatible with all types of REAL EMS models  
 Smart and solid controller can control the intensity by different 12 stages  
 Once you click the MODE button, you are able to enjoy 4 types of models simply and easily

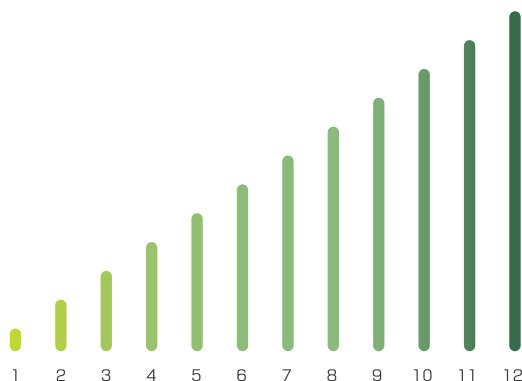

#### >> Controller Overview

- \* When the controller is switched on, it operates for 20 minutes and automatically powers off after 20 minutes.
- \* It takes approximately three hours for a full charge, there is no indication when fully charged. Charging hours may differ based on the charging method or the voltage.
- \* Once the controller is fully charged, user may use it up to 7~8 sessions.
- \* Product should not be used while charging, please disconnect the cables when charging.

#### >> Able to control the intensity by 12 stages

*We will make you to experience the powerful and soft low frequency stimulations*

> 4 types of modes

BLUE LED  
**Aerobic/Massage modes** 10Hz

You can feel like you're tapping your muscles by sending similar stimulations to your muscles when you actually do aerobic exercise. We recommend this mode when you are doing aerobic exercises.

GREEN LED  
**Massage modes** 50Hz

The stimulations from the massage modes will permeate into the muscles and it will make the tensed muscles to be relaxed.

RED LED  
**Muscular modes** 80Hz

Only the stimulation can improve the ability of muscles to exert strength by causing muscle contraction as in actual muscle exercise.

WHITE LED  
**Automatic modes** 10-80Hz

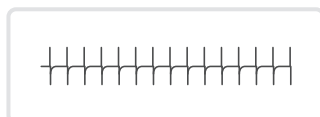

Above the 3 types of modes will be operated automatically

> Hertz Waves

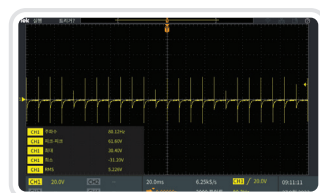

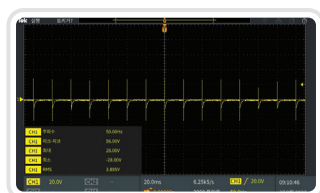

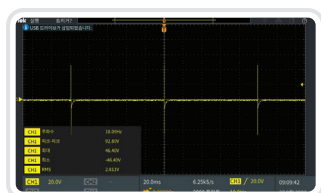

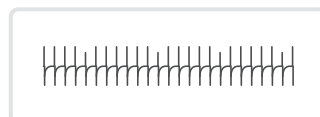

Blue Mode · 10Hz

Green Mode · 50Hz

Red Mode · 80Hz

## Participating in the largest exhibitions in Korea and overseas every year

REAL EMS participates in exhibitions held overseas and in Korea every year. And that's where we listen to experts and our customers.

REAL EMS participated in the world's largest global sports fitness exhibition, FIBO, Germany, CES, the world's largest consumer electronics exhibition in Las Vegas, the United States, IFA, Europe's largest consumer electronics exhibition, and Panama EXCOMER, South America's largest comprehensive trade exhibition. Through these activities, we have received good reviews from buyers around the world, and we are currently conducting distribution contracts and export performances mainly in the ASEAN market and Japan. Starting with Japan and Vietnam, we will complete distributor contracts with overseas corporations and leading overseas partners and establish a global service network to become Korea's main EMS brand.
