

Poseion BT100® TECHNOLOGY

Global patented product "Poseion BT100®" is a Beauty Care showerhead that makes 'Revitalizing Water', the best water for your skin by using 'Magnetized Counter-Spin Water Revitalizer'.

Poseion BT100® "Magnetized Counter-Spin Water Revitalizer"

Revitalizing water

Poseion BT100® obtained **59.062Hz of water cluster** measurement by KBSI, the authorized testing institution from KOLAS (Korea Laboratory Accreditation Scheme).

By the powerful effect of 'Magnetized Counter-Spin Water Revitalizer', the water from Poseion BT100® turns into very fine and structured water molecule to cleanse and remove impurities from your pores and fill your pores with the Revitalizing Water that is good for your skin (moisturizing).

Poseion BT100® TRIPLE CARE SYSTEM

Results from independent clinical testing conducted on the Poseion BT100® by the internationally recognized Korea Testing & Research Institute (KTR) show the following after 4 weeks of use:

- > Reduction in skin's oiliness by 78.19%.
- > Reduction in skin's sebum by 24.23%
- > 3.13% increase in the color tone radiance of the skin.
- > Reduction in scalp oiliness by 83.06%.
- > 403.13 % increase on the in the hydration of the scalp.

01. SKIN CARE

The reduced surface tension of the Magnetized Water produced by the Poseion BT100® allows water to flow less restricted, deep into and irrigate your pores to deliver a deeper rinse that helps you control and remove oil, sebum, and the other contaminants that accumulate on your skin throughout the day. Magnetized Water's molecular compatibility with your skin allows you to get an unprecedented feeling of skin hydration that is experienced deep in the layers of your skin and not just on the surface.

02. HAIR & SCALP CARE

The Poseion BT100® was designed to power Magnetized Water deep through dense voluminous hair to remove and control sebum and oil, as well as the chemicals and contaminants associated with hair loss from your scalp. As the Magnetized Water saturates your hair and scalp, the reduced surface tension of the Magnetized Water penetrates deep to irrigate your hair follicles and the pores of your scalp to deliver a feeling of satisfying hydration without the oiliness or dryness.

03. ENVIRONMENTALLY FRIENDLY

Poseion's Signature Microplate contains 315 – 0.20 mm diameter holes and is responsible for producing the relaxing high-pressure shower experience that helps the Magnetized Water easily, quickly, and effectively saturate and rinse your body. All while using up to 35% less water on average compared with a conventional showerhead.

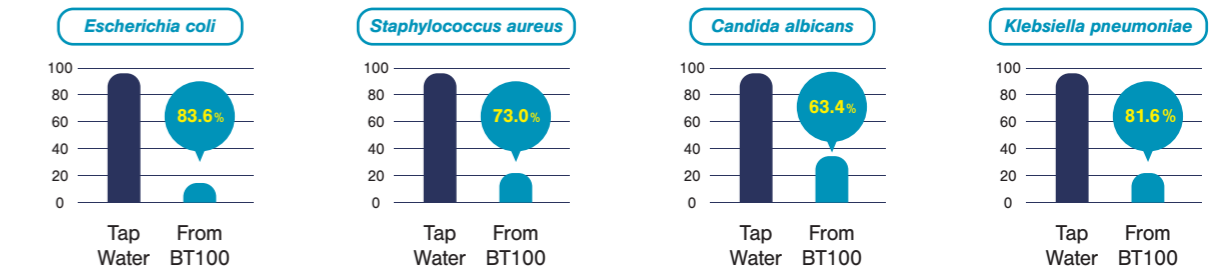

The Revitalizing Water from Poseion BT100® has a similar function as a natural surfactant, so it is an eco-friendly product that requires less use of chemicals such as shampoo and conditioner.

Natural Anti-bacterial effect and Anion effect of Poseion BT100®

Natural Anti-bacterial effect

The Revitalizing Water from Poseion BT100® has its own **natural Anti-bacterial effect** which helps clean and healthy skin.

Anti-bacterial Test Results of Poseion BT100 by KCL(Korea Conformity Laboratories)

Anion effect

Poseion BT100® generates **360K natural anion per second**. You can enjoy the fresh feeling near the waterfall when you take a shower at the home ('Lenard effect').

Poseion BT100® Main Components

Poseion Sediment filter 'SF140'

The SF140® Sediment Filter Set contains 4 x replacement filters made exclusively for use with the Poseion BT100® Showerhead.

The High-Density Polypropylene Filter filters out undissolved hard water sediment and particles – 5 microns and larger (roughly the size of one of your smallest blood vessels) typically left behind to accumulate on your hair and in the pores of your skin & scalp.

Please Note: The life of your SF140® Sediment Filter depends on the quality of the water in which you use the Poseion BT100® Showerhead. We recommend filter changes every 4-6 months to ensure that your BT100® is working optimally.

Recommended Use

How to enjoy the Poseion BT100® 100%

1 If you have athlete's foot or eczema take a foot bath in warm water for 10-20 minutes every day.

2 If you have skin problems, spray water over the trouble area like giving yourself a massage for 30 seconds after a shower. Make sure to cool down the concerned area with cold water.

3 After a shower, spray water every day on your face 10-30 seconds using a water pressure that suits you. Notice the changes in the skin.

4 For companion animals, check for the tangling of hair and changes in hair quality when combing after a bath.

5 Massage the scalp and compare it with how it was when you used a conventional shower head.

BT100 Product Specification

• Model Number	Poseion BT100®
• Product Components	Showerhead Assembly Housing, Sediment Filter, Magnetized Counter-Spin Water Revitalizer, Microplate
• Product Materials	Polypropylene/Polycarbonate/Aluminum
• Product Dimensions	(D)9.3cm X (W)7.2cm X (H)24.2cm, 350gram
• Installation Method	Easily installs and fits all standard showerhead hoses.

SF140 Product Specification

• Model Number	SF140
• Product Components	High-Density Polypropylene Sediment Filters (Sediment filter Set contains 4x replacement filters)
• Product Materials	Polypropylene
• Product Dimensions	(D)3.4cm X (W)11cm X (H)13.5cm, 60gram
• Installation Method	Easily unscrew handle and replace with new filter.
