## KLLOM's tankless technology is perfect and complete.

KLLOM is a true tankless instantaneous heating bidet without a hot water tank.

Tankless KLLOM saves energy by lowering standby power and eliminates the hot water tank

where bacteria or impurities may exist, enabling clean and hygienic cleaning.

Tankless KLLOM is a luxury bidet designed by INTERTEC's own technology to enable continuous cleaning at the desired temperature using a ceramic heater.

## Special Feature of KLLOM

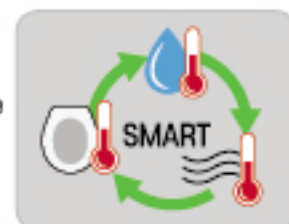

The instantaneous hot water module applied with our patented [Patent No. 10-2203158] technology is a first-class bidet that guarantees perfect hygiene and the highest energy efficiency.

Instantaneous heating module

Sitz bath

It is a health-keeper bidet that can be washed continuously for up to 5 minutes at a maximum of 40°C, and is useful for pregnant women and people suffering from an anal disease.

Smart care function

This function automatically optimizes the water temperature, seat temperature and drying temperature. It is a bidet with a machine learning function in consideration for convenient use by those who are not familiar with using a bidet.

RF type touch remote control

The bidet is a premium class that uses RF Remote Control, which prevents malfunctioning in communication. It also employs a smart touch keyboard and is IPX5 waterproof.

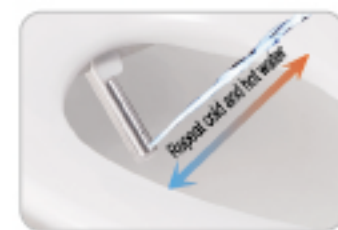

## Key Points of KLLOM

Stainless Nozzle

Full stainless steel nozzle is applied for hygienic cleaning.

Hot and cold massage

Cold and hot water are repeatedly sprayed to give a hot and cold massage effect.

Nozzle cleaning

This function cleans the nozzle before and after using the bidet.

Illumination

You can use the bidet conveniently at night without turning on the light.

## Features of KLLOM

RearFront Move

Warm air dryer

Nozzle position

kids

Energy saving

Deodorization
