KLLOM Tankless

KLLOM is a tankless instantaneous hot water bidet using direct water. Because there is no water tank, it is clean and sanitary, free of contaminants and bacteria.

Perfect tankless technology of KLLOM!

KLLOM is a tankless instantaneous hot water bidet that does not require a tank.

Tankless KLLOM may save energy by decreasing standby power, and it is clean and sanitary because there is no place for germs and impurities.

Tankless KLLOM employs a ceramic heater to maintain the optimum temperature throughout cleaning. It is an ideal premium bidet created with INTERTECH technology.

Features

POINT 01

Instantaneous hot water bidet with minimal energy

The KLLOM tankless bidet employs a 3rd generation instantaneous hot water module created with Intertek's own patented technology, which may significantly cut carbon emissions with an energy efficiency of more than 95 percent and **lower electricity expenditures by up to 63 percent (standby power 0.8W)**

Direct water bidet with no tank

By employing flowing straight water, free of impurities and contaminants (tank type uses stored water), **the cleaning process is clean and sanitary.**

POINT 02

POINT 03

The first smart care bidet in the world with a repeating learning feature

It automatically uses the appropriate temperature by storing and analyzing hot water, toilet seat, and drying temperature, making it **convenient for youngsters and the elderly** who are using the bidet for the first time or are unfamiliar with various functions.

Goodbye, tiredness of a long day! Washing in a Sitz bath

A sitz bath system that calms the body. It is possible to wash constantly for 5 minutes at a steady temperature with a temperature fluctuation of 1°C, which is highly good for the anus and vaginal patients or pregnant women who require a sitz bath.

POINT 04

POINT 05

Waterproofing to IPX5 standards

It is designed to use a clean bidet at all times by permitting safe water cleaning without concern about safety or malfunction.

Remote control feature using RF connection (KL500)

It avoids malfunctions by improving the waterproof level and decreasing interference from obstructions, illuminance, and three wavelengths with a clear image, as well as an RF connection mechanism with a touch panel.

POINT 06

Advantages of KLLOM Tankless Bidet

1 Powerful and quick nozzle cleaning

When you rise up after using the bidet, high-temperature cleaning water is shot into the nozzle to swiftly clean the nozzle, allowing you to utilize the bidet in a clean and clean environment.

2 Gentle air bubble cleaning

Cleaning the air bubbles expelled by the air pump allows for soft and rapid cleaning, and the bidet may be used even in locations with low water pressure since the air compensates for the proper water pressure.

3 Rhythm Massage

When washing, the flow of water is massaged regularly in 5 stages, and cold and hot water are alternated for 5 minutes to double the impact of comfortable bowel motions and feces.

4 Warm air drying

Dry the area to be cleaned with 6-step warm air.

5 Heated toilet seat

It can be used by adjusting it in 4 steps according to the season.

6 Automatic lighting

When it grows dark, the lamp automatically brightens the room, allowing you to use the bidet without turning on the bathroom light.

7 Power-saving mode

When you select power saving, the temperature of the toilet seat is kept lower than the specified temperature, resulting in cheaper electricity expenses. (Standby power consumption: 0.8W)

8 Simple separation with one touch

By removing the bidet with a single touch, you can easily clean every nook and cranny.

9 Cleaning for Children

Even children may use the bidet securely and pleasantly.

10 Opening and closing with care

The soft opening and closing function allow the seat to open and close gently and quietly.

11 Deodorization

The deodorizing function allows you to use a fresh toilet every day.

12 Safety

Human body identification sensors, low-temperature burn prevention, and a freeze protection feature have all been implemented to ensure safety.
