“The REVOLUTION of SKIN CARE”!

avea

This is not a Cleanser or Toner!

The New Genuine PRIMER!

AVEA PORE TIGHTENING PRIMER :

Skin care PRIMER is a product applied to the skin before applying foundation or cushion to prepare the base and prevent it from crumbling." "Primer smooths and fills in uneven skin texture before applying foundation or cushion.

This pore Primer from AVEA introduces a new functionality does not present in the conventional skincare market, setting it apart from competitors' products.

AVEA One Minute Oxygen(O₂) Bubble Pore Instant Tightening Cooling Primer

Aging Defense & Blanc

Background of Product Creation:

This Mildly Acidic Bubble Primer was developed for individuals concerned about enlarged pores, addressing issues such as makeup caking or skin sagging due to enlarged pores.

It is applied before sunscreen, BB cream, or makeup to tighten and manage the skin, providing a firm and tight appearance.

Furthermore, This Primer is a product that helps make your makeup more radiant and enchanting as well as enhancing your skin condition.

AVEA's innovative and efficient skin care products bring real visible results!

AVEA One Minute Oxygen(O₂) Bubble Pore Instant Tightening Cooling Primer

This Primer is a product designed to quickly tighten enlarged pores by deeply penetrating the oxygen bubbles into the pores, providing firm care to the skin.

Aging Defense & Blanc Primer instantly smooths the look of lines and pores.

It's formulated with cooling Scutellaria Baicalensis extract and Honeysuckle Flower extract, which, along with oxygen bubbles, instantly tightens the skin upon application, leaving it smooth.

Patented tannin complex ingredients and high levels of Niacinamide and Adenosine help care for pores in the skin, promoting a firmer complexion.

The Primer also contains 12 Peptides to care for resilient skin.

In the end, the Primer effectively manages pores deep within the skin, leading to overall skin improvement

It all takes just 1 minute!!!!

Honeysuckle Flower

Active Ingredient: Benefits of Honeysuckle Flower Extract

Honeysuckle flower extract, otherwise known as *Lonicera Japonica* or Japanese Honeysuckle, is an anti-inflammatory and soothing ingredient commonly used in traditional Chinese medicine. The Extract has more than 140 compounds identified with antiviral, antibacterial, and anti-inflammatory properties. It also contains chlorogenic acid, a polyphenol which is a bioactive component of the flower.

- Eczema & Rosacea: thanks to its potent anti-inflammatory properties, honeysuckle extract can treat skin conditions like eczema and rosacea
- Sun Damage : Rich in flavonoids and saponins, honeysuckle can protect the skin against free radicals that lead to skin damage and signs of aging.
- Dullness: excellent skin conditioning ingredient that can really transform your complexion and give it that glow its been missing.
- Grime: it is antibacterial, and anti-inflammatory suggests that it could treat symptoms of acne and prevent breakouts.
- Rashes: anti inflammatory and an excellent formula to treat rashes and poison ivy.

AVEA' O2 Bubbles Pore Instant Tightening Cooling Primer infused with Honeysuckle Flower extract brings anti-inflammatory benefits to our skin!

Active Ingredient: Benefits of Scutellaria Baicalensis Extract

The root extract of this medicinal plant contains more than 40 bioactive compounds, including flavonoids, terpenoids, polysaccharides, and essential oil with volatile components. The component tyrosinase in Scutellaria Baicalensis extract inhibits melanin production in our skin, helping to suppress pigmentation and improve skin tone, thereby enhancing skin health.

Additionally, thanks to the component baicalein, it helps prevent wrinkle formation by moisturizing the skin and providing antioxidant effects.

This medicinal plant extract is a natural ingredient for skincare formulas that soothe inflammation, protect from photoaging and harmful microbiota, and hydrate skin, enhancing water-binding ability.

AVEA' O2 Bubbles Pore Instant Tightening Cooling Primer infused with Scutellaria baicalensis extract brings anti-oxidant benefits to our skin!

Scutellaria Baicalensis Flower

Active Ingredient: Benefits of Patented Tannin Complex:

Tannins are a natural compound you may have heard about a lot or never heard of at all. Read on to discover how tannins within Thayers Witch Hazel products are effective in reducing redness, soothing irritations, eliminating blemishes and much more.

The patented Tannin complex, which formulated in AVEA O2 Bubble Pore Primer, helps tighten pores and control sebum; formula for effective pore care. Tannin complex: 8 plant-based extracts effectively reduce enlarged pores and excessive sebum.

AVEA' O2 Bubbles Pore Instant Tightening Cooling Primer infused with patented Tannin complex brings intensive care of pores!

Active Ingredient: Benefits of Adenosine

Adenosine is a potent ingredient in skincare products that is renowned for its capacity to minimize the appearance of wrinkles, fine lines, and other ageing signs. The following are some of the advantages of adenosine in skincare:

- Aging Defense : boosting collagen production
 - Soothing : improving skin elasticity
 - Moisturizing ; enhancing skin hydration
 - Wound Healing ; soothing inflammation
- Safe & Non-Irritating : strengthening the skin barrier

AVEA' O2 Bubbles Pore Instant Tightening Cooling Primer infused with Adenosine which brings real visible results!

Active Ingredient: Benefits of Glutathione

its potent antioxidant activity: the ability to fight oxidative damage over time, to help restore skin's barrier and as mentioned, to help improve the look of discolorations and promote an even skin tone.

Applied directly to dark spots, Glutathione on skin improved the look of sun-exposed areas.

Active Ingredient: Benefits of Niacinamide

Niacinamide is a type of vitamin B3, one of eight B vitamins that support many aspects of your health. Your body makes niacinamide when you have too much niacin in your body. Your body can also change an amino acid called tryptophan into niacinamide.

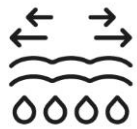

- **Boost Hydration:** may enhance the function of your skin's lipid barrier (a layer of water and oil that protects your skin).
- **Calm Redness:** shown to ease inflammation, which can help calm redness due to conditions like acne, rosacea and eczema.
- **May Reduce the Appearance of Pores:** may help minimize their appearance by helping keep your skin smooth and clear
- **Treat Dark Spots:** dermatologist-approved for brightening skin tone.
- **Reduce Wrinkles and Fine Lines:** This vitamin's antioxidant properties may help protect your skin and aid its recovery from damage due to factors like aging, sun and stress.

Direction:

1. Dispense an appropriate amount of foam and apply thinly to the desired area.
2. Wait for the bubbles to naturally burst for 30 seconds. This product is designed for those concerned about enlarged pores, with fine oxygen bubbles penetrating deeply into the pores, rapidly reducing them and providing elasticity to the skin.
3. Once the bubbles have partially burst, gently tap the skin to facilitate absorption.
4. Wait for about 30 seconds until the contents are fully absorbed.
5. After using this bubble, you can apply makeup or color cosmetics as desired.
6. Alternatively, after applying your base makeup, you can follow the same method and then proceed with sunscreen and color cosmetics.

Tip: For dry skin, simply apply a moisturizer or cream before makeup. For oily skin, finish your skincare routine with a suitable toner before applying makeup.

AVEA One Minute Oxygen(O₂) Bubble Pore Instant Tightening Cooling Primer

Alternatively, use it after basic makeup application, followed by sunscreen and makeup. (After applying an appropriate amount to the face, wait until you feel a bubbling sensation, then you can apply sunscreen and makeup.)

With a high concentration of Niacinamide, if you experience slight whitening after application, you can apply your usual lotion or cream lightly.

Please note that you may feel a slight tingling sensation as tiny bubbles burst on your face.

After application, there may be some stickiness when patting the product onto the skin, but once it thickens, the stickiness diminishes, leaving a smooth sensation.

And then, you can proceed with your basic makeup or color cosmetics.

The concept of this product is to provide a sensation similar to applying a primer to the skin, where it tightens and smoothens the skin rather than providing a tightening feeling upon absorption.

It can ALSO be applied to the necessary areas after cleansing or basic makeup, before applying color cosmetics, or used as a sleeping mask before bedtime.

“Aging Defense & Blanc”!

“Defense” implies the proactive prevention of wrinkles and aging in skincare, replacing the term “anti-wrinkle,” which may feel burdensome to the younger generation.

“Blanc” means “white” and is used in products related to whitening or brightening.

“AVEA One Minute Oxygen Bubble Pore Instant Tightening Cooling Primer brings you Aging Defense & Blanc”!

AVEA Primer has an acidic pH that smoothens the skin's surface, minimizes pores, and conceals skin imperfections, allowing makeup to adhere beautifully to the skin without caking and lasting longer.

Additionally, it has dual functionality (Aging defense & Blanc) to overall improve the skin.
