

HIHIP PATENTED HIP CORRECTION CHAIR SEAT

Comfort Seats Recognized by the public

This high-quality cushion seat has been manufactured in South Korea and provides utmost comfort. The cushion seat is 80mm(3.15inches) thick and provides extra comfort, making it ideal for long sittings preventing any tiredness.

Foldable Design

The foldable design makes it easy for you to use this chair anytime, anywhere. It is easy to move or carry with the handle located in the back of the chair. You only need a small space to store it. Simply fold it and store away when not in use.

Hihip Patented Hip Correction Chair Seat Distinctive Characteristics

Used Anywhere, Anytime

Try this Hihip posture correction chair with back rest in your daily life. You can use it while eating, watching movies, or resting after some housework. You will be surprised at how comfortable it is to sit on the floor.

Patent and Professional Study in Technology

The posture correcting technology patent has been registered in South Korea.

This patented cushion seat has been added to the Hihip Posture Corrector with Back Rest, and is the result of a joint development between Nine Technology, Inc and Hanyang University Physical Ergonomics.
