Thin & Elastic Fixing Power

Healing Performance Wrist Brace

 **smart-fit | Wrist**

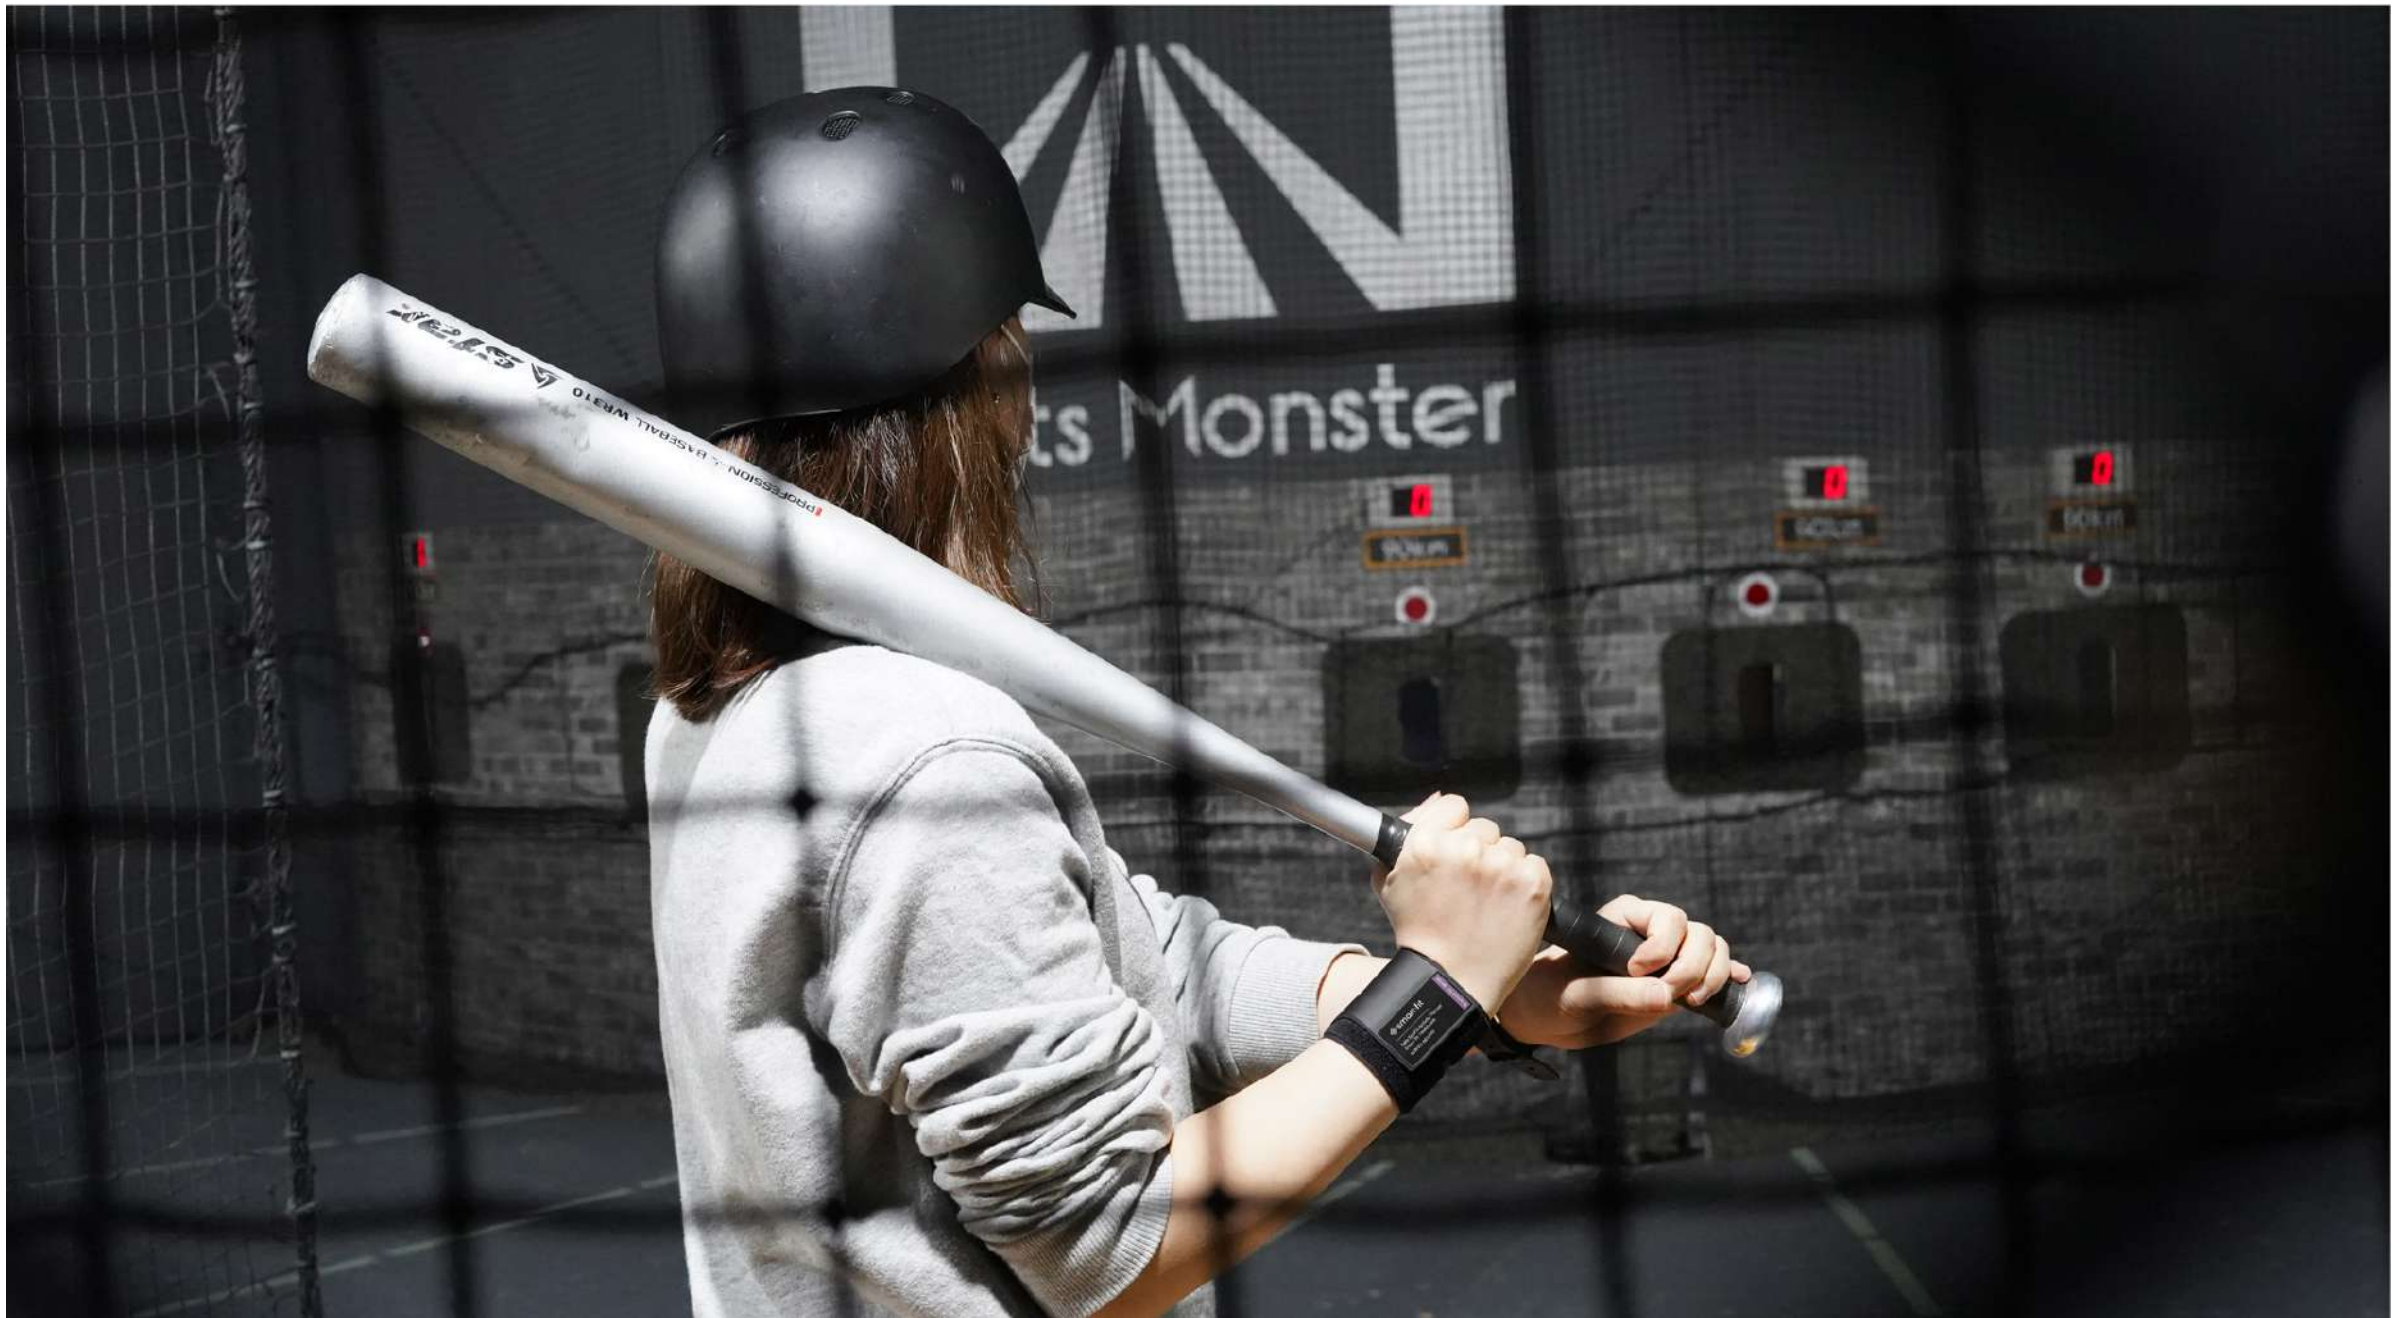

Living Exercise Injury Rate

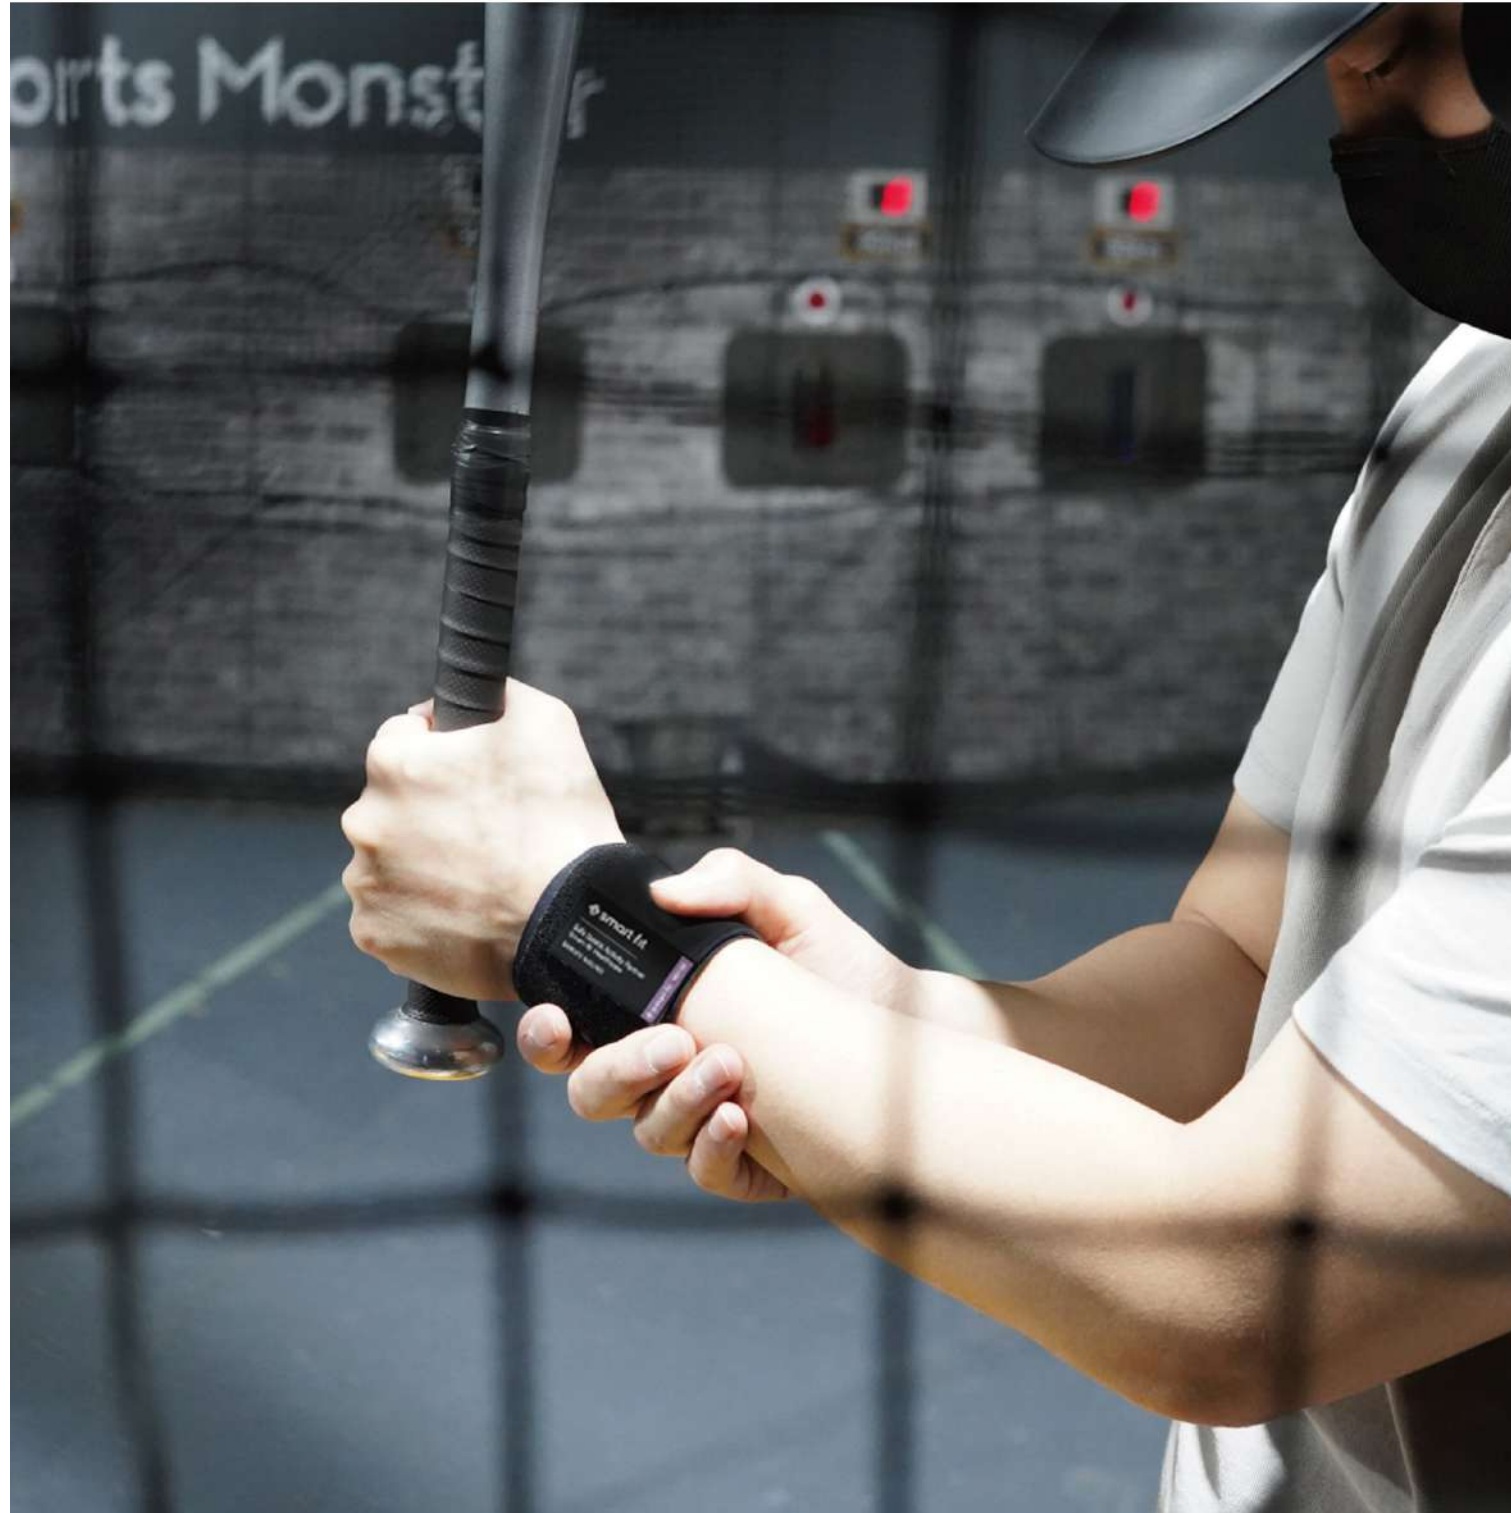

3rd

Too much excessive bending
Wrist ligament injuries

**Especially,
Wrist breakable
too much while workout**

Upgrade Performance for **Support Wrist**

In daily life

Protect Wrist

The reason for injuries
Protect your body?

Soar Wrist for
Manage
for you smartly

My Wrist felt sore
Smart-Fit
Thought about it.

The wrist is the thinnest joint in the body. I use it too much compared to the soft thickness. If your wrist was uncomfortable, it's because you have no choice but to enjoy great discomfort in sports as well as in daily life...

High quality service and special products. Above all, because of its high price and accessibility, it is not easy for life sportsmen to use. Can I just leave it alone?

Smart-Fit decided
to **find a way**

Let's make a protector
that can protect
your wrist yourself

Research & Developed by current
rehabilitation therapist and physical therapist

 smart-fit | Wrist

*Rehabilitation
therapist*

김수*

*Physical
therapist*

Current rehabilitation therapists and physical therapists collaborated and made efforts and attempts, and after hundreds of sample tests, the wrist guard was completed.

Prepare in advance

Wrist Injuries Even Athletes Can't Avoid

“

There were a lot of repetitive swings,
so my wrists were strained and
injuries occurred.

”

CERTIFICATE OF PATENT

Joint guard for preventing injuries in sports activities

위의 발명은 「특허법」에 따라 특허원부에 등록되었음을 증명합니다.
This is to certify that, in accordance with the Patent Act, a patent for the invention has been registered at the Korean Intellectual Property Office.

NOW
It's time for
Smart-Fit Wrist Brace

Stable and unshakable

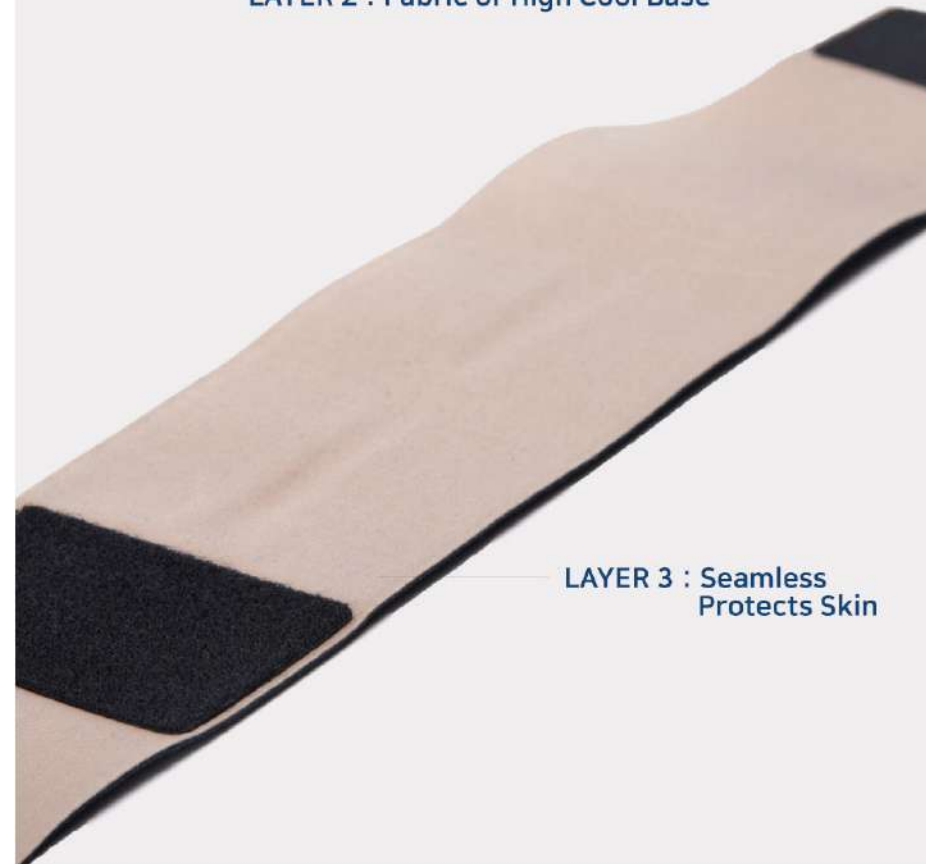

**Reinforced pressure
control film that
holds tightly**

LAYER 1

LAYER 2 : Fabric of High Cool Base

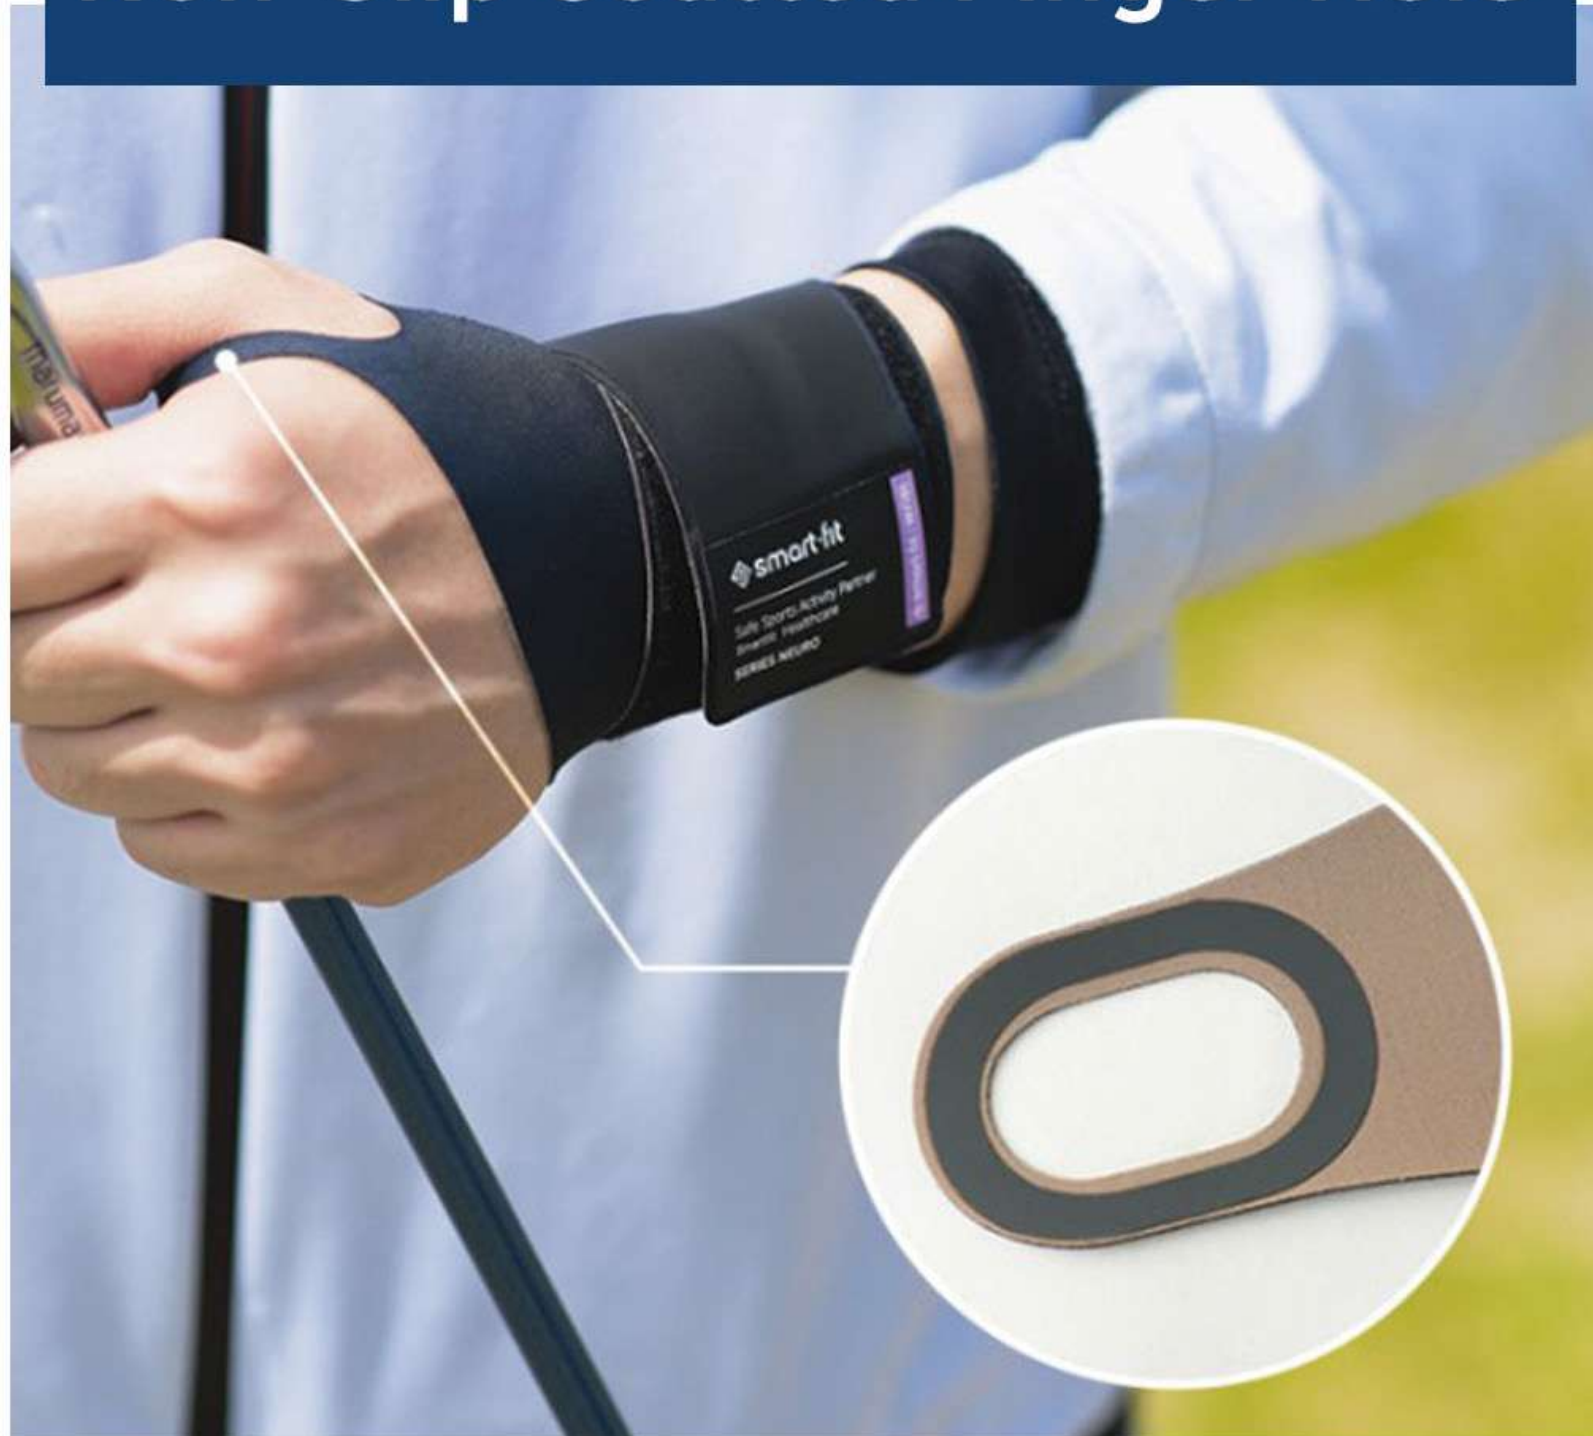

LAYER 3 : Seamless
Protects Skin

Smart pressure control reinforced film! Because it holds the wrist tight with adequate support, it prevents excessive bending of the wrist during workout.

Holds from **thumb** to **wrist**

Non-Slip Coatted Finger Hole

The **finger hole** part that moves on the finger was carefully considered. **Non-slip coating** is applied to **hold it** without slipping while wearing

01

3rd year of basketball club member

*“Functionality is important,
but it should be comfortable”*

I used another wrist guard every time during the basketball game, but it was **uncomfortable when I workout**, so I took it off right away. Since the movements are intense, I look for **products that are comfortable to wear**.

Comfortably wraps around the wrist

0.5mm Thick

The thick, sweaty and stuffy protectors of 4mm or more must have felt like shackles rather than protectors. The [Smart-Fit](#) wrist guard fits your wrist of [0.5mm thick](#), less than 1mm! It's comfortable to wrap around.

Thick of Coin

Think of
Wrist Brace

Even compared to a coin, the thin wrist brace is 0.5mm thick

Only 15g

Stuffy? NO, High elasticity Fabric

Comfortable Fit! sticking adhesion

Nylon + Spandex It is not stuffy at all even if you wear it for a long time with the combined new material.

How To Use Smart-Fit Wrist Type Brace How to wear it?

1. Please fix it by hand, Velcro facing the inside of the wrist.

2. Rotate the wrist brace in the same as photo shows and attach it with the inner Velcro and wrap your wrist.

3. Pull and wrap until you feel the desired pressure.

4. After attaching to Velcro, check if there is hard pressure.

How To Use Smart-Fit Thumb Type Brace How to wear it?

1. Please fix it by hand, Velcro facing the inside of the wrist.

2. Rotate the thumb brace same as photo shows and attach it with the inner Velcro and wrap your wrist.

3. Pull and wrap until you feel the desired pressure.

4. After attaching to Velcro, check if there is hard pressure.
