Product Introduce

Product Name: Motion Grip

www.movelab.co.kr

Product Features

- The Motion Grip moves up down left right and 360° rotation, provides an optimal grip even when the position of holding the phone changes.
- The Motion Grip is used as a cradle that adjusts the horizontal and vertical angles moving the strap.
- Chargeable wirelessly by detaching easy the metal plate of the Motion Grip from the mobile phone.
- It is compatible with vehicle cradle, wireless charging is possible at the same time as vehicle cradle by detaching the metal plate.

There is no handle on the expensive and precious cell phone.

★ ★ Cell phones are used for numerous purposes ★ ★

The holding position changes frequently depending on the intended use.

Free-moving strap

The motion grip moves the magnetic strap in all directions, enabling a comfortable cell phone grip and standing cell phone.

Various holding positions that vary depending on the purpose of using the cell phone

When storing pockets

Use a comfortable 45 degrees/when calling

When touching the end of the screen/
For walking

When taking a one-handed selfie

In landscape orientation
When watching a video

When typing a message one-handed

Problems with existing cell phone grip products

"Cannot be used if the holding position changes"
