All about your beauty

WHITE ROSA

lifting thread

CE 2764

Global leader of lifting threads

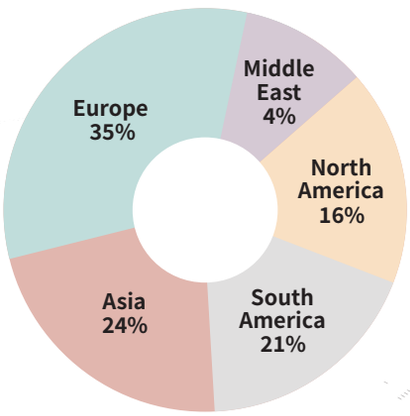
The WHITE ROSA lifting thread is recognized on the global market for its distinguished quality. With our R&D team, we try to satisfy our customers through three core values: innovation, trust and communication.

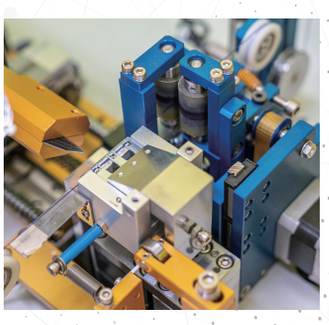
The processing equipment of all models, including lift king and cog, was designed and developed by our R&D team.
To maintain the best quality, all processes related to production, such as sterilization and drying, are strictly managed according to the standards CE 2764 ISO 13485 GMP

EXPORT STATUS

It captivates global markets in 39 countries!

Derma Solution is a reliable global medical company. Thanks to our experience and skills, we established a solid global infrastructure and export overseas to 39 different countries.





CERTIFICATE STATUS

The White Rosa lifting threads have been verified for safety worldwide by obtaining GMP, ISO, and European CE standards.

CE European Union Integrated Standard Certification

ISO

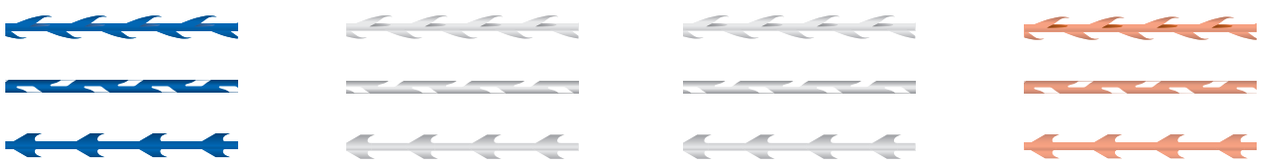
Medical device manufacturing and quality management standards

Medical device manufacturing license

Test report

THREAD MATERIALS

PDO	PLLA	PCL	PDRN PCL
6Month~1Year	1Year~2Year	2Year~3Year	2Year~3Year

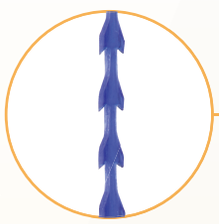


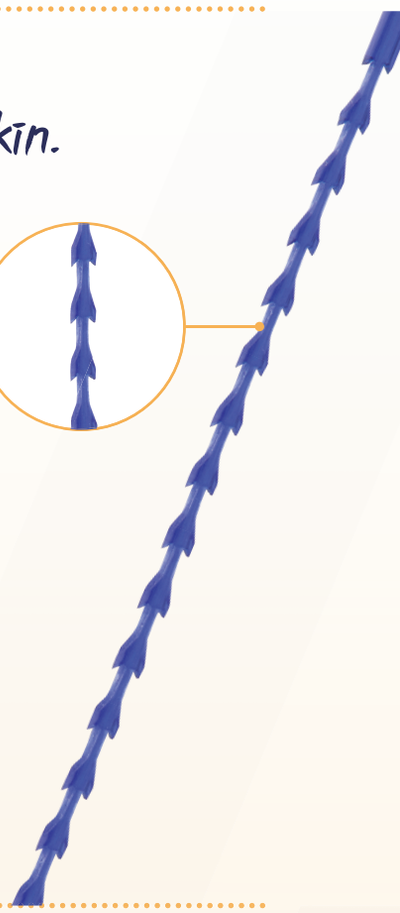
NEEDLE TYPE

ARROW

It's a two-way molding technique to fix strongly skin.

WHITE ROSA ARROW is made with a special molding technique, which allow its two-way design. It is characterized by its excellent tensile strength and strong skin fixation. The lifting effect is strengthen by duration and is able to take care of deep and dark wrinkles. In addition, it is made out of PDO threads, which naturally decompose in the body after a certain amount of time, resulting in less burden.



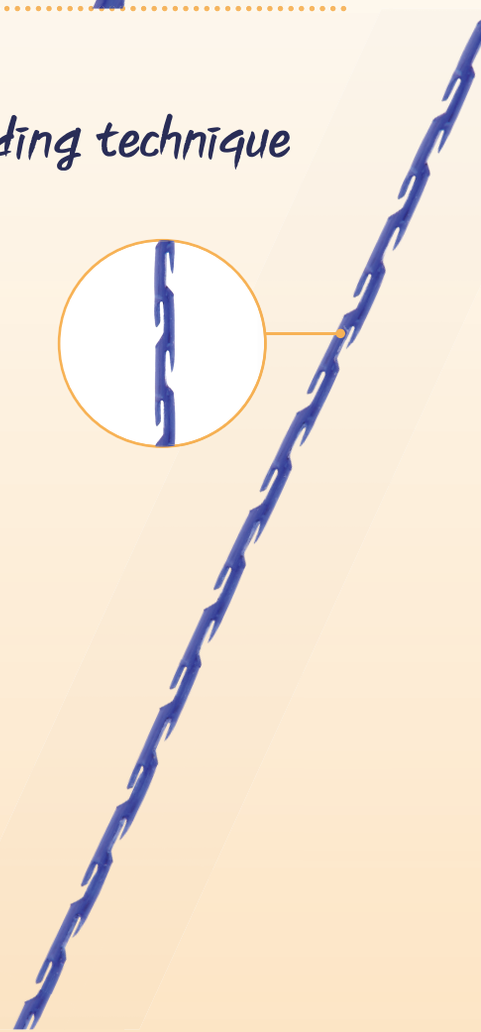


- Two way molding thread
- Excellent tensile strength
- Strong fixation of the skin

LIFT KING

Power lifting effect of the special surface molding technique with sawtooth structure.

WHITE ROSA LIFT KING is a molding thread with a special sawtooth-like surface structure. The multi-directional, deep teeth hold the skin like a hook when pulling the thread, making it more firmly fixed; it has an excellent fixing power and strong lifting effects.



- Saw toothed structured molding thread
- Strong lifting effect
- Stable fixing power

KING COBRA

Effective lifting with a powerful 360° 6D spine

WHITE ROSA KING COBRA is a lifting thread containing bidirectional barbs in 360° 6D dimensionally. Stronger fixation and more elastic lifting effect can be expected as the KING COBRA is in the form of vertical barbs, while the existing COG threads were in the form of diagonal barbs.

- 360° 6D dimension
- Tensile force
- Pulling capacity
