

Capturing Sunlight

LUMICRION MINI

Bright 5000K Light Like Natural Sunlight
Capturing Colors Accurately with
a Color Rendering Index of Ra95

Lumicrion MINI is a high-quality mood lighting solution that offers light close to natural daylight.

With a color temperature of 5000K and a ***Color rendering index (CRI) of Ra95**, it accurately represents the colors of objects, making it useful in various situations such as makeup application, reading, working, and artistic activities. **Its high-output bright light** is practical not only for home use but also for camping, whether inside tents or vehicles. When needed, **you can easily dim the brightness with a single touch to create a comfortable and cozy mood lamp.**

***What is Color Rendering?**

Color rendering is an index that indicates how naturally and accurately a light source displays the colors of objects it illuminates. It is set to 100 based on sunlight (natural daylight) and evaluates how closely artificial lighting reproduces colors similar to natural light.

A CRI of 95 or above is considered excellent lighting close to natural daylight, preferred in stores, galleries, medical institutions, and more.

When used with a portable battery, Lumicrion MINI becomes easy to carry, allowing you to create your desired lighting environment anywhere. With its minimalistic design, user-friendly functionality, and reliable **South Korean manufacturing quality**, Lumicrion MINI becomes a life companion that adds sunlight to your daily life, not just a lighting device.

Illuminate Your Daily Life with Sunlight

Light has a significant impact on our lives.

Light has a significant impact on our lives. Beyond simply brightening a space, it affects our mood, health, and productivity.

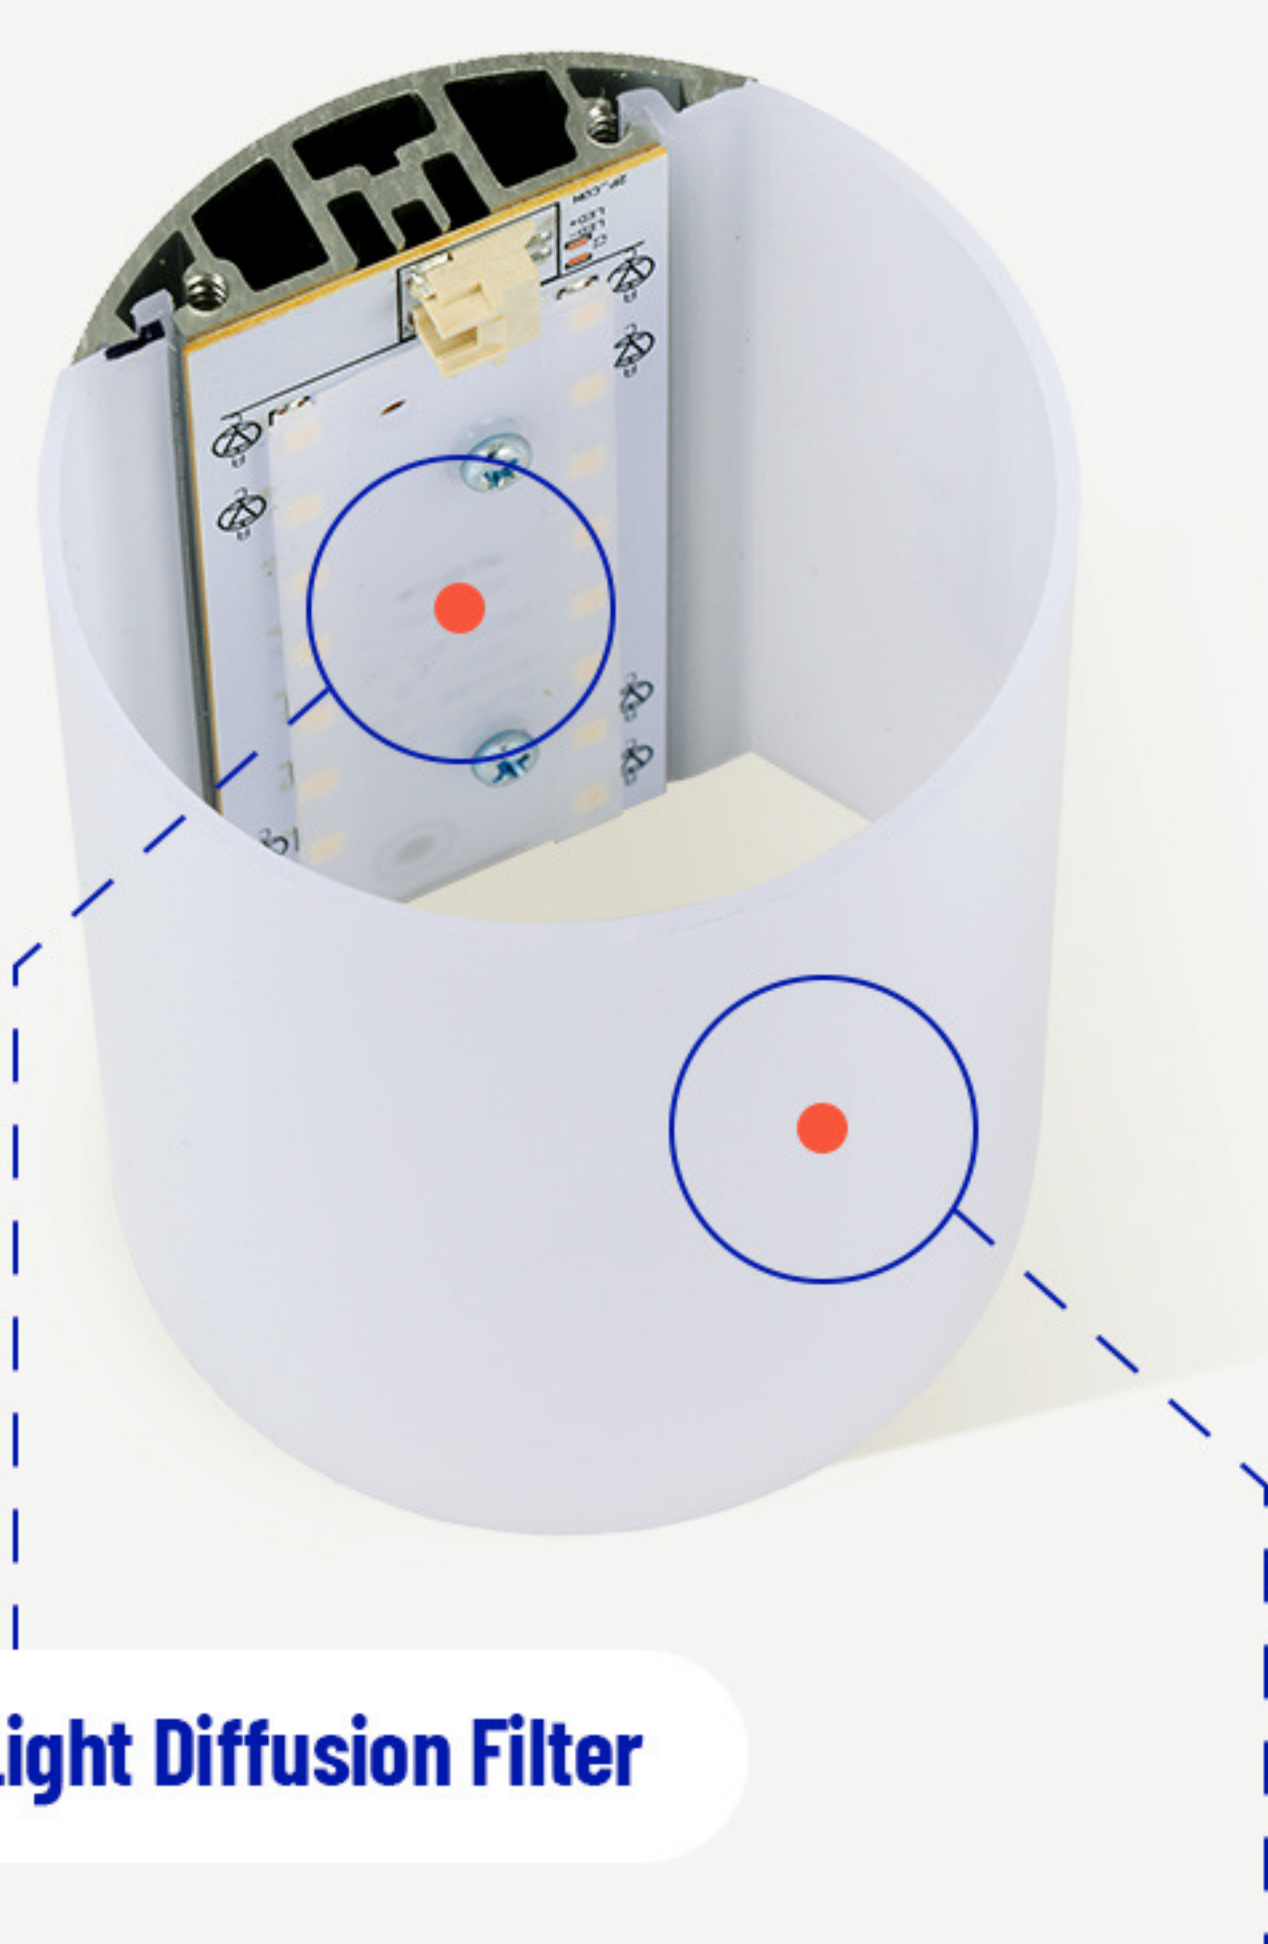

The color temperature similar to natural light and the high CRI of Lumicrion MINI display object colors without distortion and reduce eye strain, **bringing positive changes to your daily life.**

Color Rendering Index Ra95 and Natural Color Temperature for Comfortable Eyes

Reading or working under improper lighting conditions can lead to eye fatigue and decreased concentration.

Lumicrion MINI reduces eye strain with a color temperature close to natural daylight and accurately displays surrounding colors with a CRI of Ra95 without distortion. It creates an appropriate lighting environment for any activity, including makeup application, drawing, reading, and artistic work.

Primary Light Diffusion Filter

Secondary Light Diffusion Filter

Health-Friendly Secondary Filtering for Glare-Free Comfortable Lighting

The soft and glare-free Lumicrion MINI effectively minimizes glare by applying secondary filtering to reduce the directness of light. This feature minimizes eye fatigue even during prolonged use, helping you maintain a healthier and more comfortable lifestyle.

180g Lightweight and Minimal Size for Convenient Use Anywhere

Lumicrion MINI is easily portable with its minimal size and just requires a portable battery, making it convenient for use in various places and situations, including homes, camping, vehicles, and more. Additionally, it can be effortlessly attached to a tripod through the standard 1/4-20 UNC thread at the bottom.

Perfect Makeup Work with Accurate Colors Indoors

Using Lumicrion MINI at home allows you to accurately check your skin tone as if under sunlight, eliminating worries about color differences when going outdoors after applying makeup. Moreover, it accurately displays colors for delicate tasks such as bead crafts or resin art, making it useful for indoor work.

Korea Manufacturing, Designed for Light, Premium LED Lighting

Lumicrion MINI is a reliable quality lighting product manufactured in South Korea. Developed and produced directly by Duricom, Lumicrion MINI is equipped with 16 high-quality LEDs that provide bright and uniform light. Boasting excellent efficiency and brightness, Lumicrion MINI features a minimal and sleek design that blends naturally into any space.

Truly Special LUMICRION MINI

Heat Sink Design for Stability and Longevity

The heat sink mounted on the back of the lighting efficiently dissipates heat generated by the LEDs, helping to maintain the product's performance and lifespan. LEDs generate heat during operation, and if this heat is not properly dissipated, the brightness and efficiency of the lighting can decrease, and the product's lifespan may be shortened.

The heat sink prevents these issues, playing a crucial role in ensuring Lumicrion MINI operates stably for extended periods.

Use Professional Lighting in Your Daily Life

Lumicrion MINI is a smaller version of Lumicrion, a lighting solution for personal color experts, boasting an affordable price and proven quality (Made in Korea).

Experience professional-grade lighting
in your everyday life.

Perfect Gift Package, Eco-Friendly Choice

The package of Lumicrion MINI is perfect for gifting. The sturdy hinged box inside safely protects the product, while the thick paper band wrapping the exterior is neat and luxurious, allowing it to be gifted without additional packaging. This configuration, which reduces unnecessary packaging materials, is an eco-friendly choice that considers nature, satisfying both practicality and elegance.

Touch the dimming icon to switch between two brightness modes.

⚠ PRECAUTIONS

- This product is a high-power device (input standard 5W). It may not operate if a charger with 5V 2A or higher is not used.

- Be aware that using a data cable without charging capabilities may prevent the device from operating correctly.
- Do Not Use for Other Purposes
- This product does not have waterproof capabilities, so please use it indoors.
- Ensure safety by keeping the product out of reach of infants and young children.
- Handle with care to prevent injury from strong impacts.
- Do Not Place Near Fire
- Damage due to user negligence is not eligible for exchange or return.
- If foreign substances get on the product, do not wipe with oil; instead, clean with water and a soft cloth.

BRAND STORY

Lumicrion was created as a brand to enhance daily life with accurate color representation and bright, uniform light. It is well-known for helping achieve natural makeup without shadows and for minimizing color distortion in artistic work through its lighting.

Existing Lumicrion products were designed for personal color experts, and their large size and high price may have felt somewhat inaccessible to general consumers. Therefore, we created Lumicrion MINI.

We believe that light does more than simply illuminate a space it enriches people's lives.

Lumicrion MINI was created to communicate the brand philosophy of **enriching daily life with light to more people.** This product, though small, boasts powerful performance, bringing professional-grade lighting into everyday life. It is designed to be compact and affordably priced, making it easy for anyone to use.

Lumicrion MINI is not just a simple light. It redefines the standard for all daily lighting. With a color rendering index of Ra95 and a color temperature close to natural daylight at 5000K, it allows you to experience the essence of light in various moments. Additionally, its minimal design and the reliability of South Korean manufacturing demonstrate that Lumicrion MINI is an item that enhances the value of life, beyond being just a lighting device.

Bringing a Little Sunlight into My Daily Life . This is the Value Lumicrion MINI Strives For.

Now, add natural daylight to your daily life with Lumicrion MINI. Experience firsthand how your space and life can become more enriched with true light.
