Children's creative education programmes

S:implock

심플록

Introducing the KOSAC's (Korea Foundation
for Science and Creativity) **Outstanding Science
and Culture Products SIMPLOCK.**

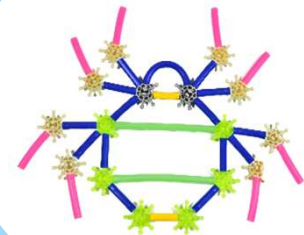

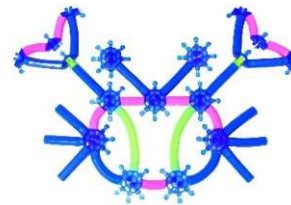

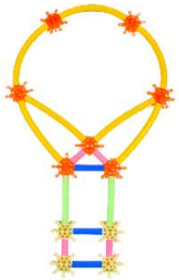

'SIMPLOCK' is a teaching aid developed in South Korea to
improve children's **problem-solving skills** and **creativity**.
With about 10 types of parts, you can easily create various
shapes.

You can download the educational materials from our
website (www.simplock.co.kr).

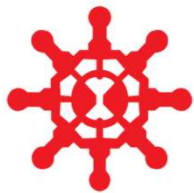

심플렉 유

It's great for my kids' creativity as they can easily represent different shapes from flat to three-dimensional.

심플렉은

It consists of about 10 different parts.
The composition and quantity of parts varies slightly from product to product.

스타(Star)

트리(Tree)

하프(Half)

바퀴(Wheel)

핀1(Pin-1)

핀2(Pin-2)

서포터(Supporter)

젠더(Gender)

짧은막대 (A Pillar)

긴막대 (B Pillar)

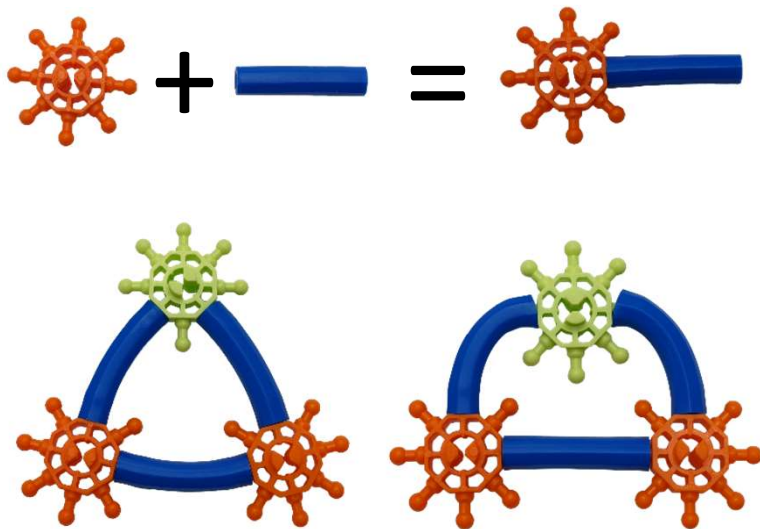

튜브 이름 : 길이 + 색상
예, SP(짧은 핑크), LB(긴 파랑)

Tube Name : Length + Color
ex, SP(Short Pink), LB(Long Blue)

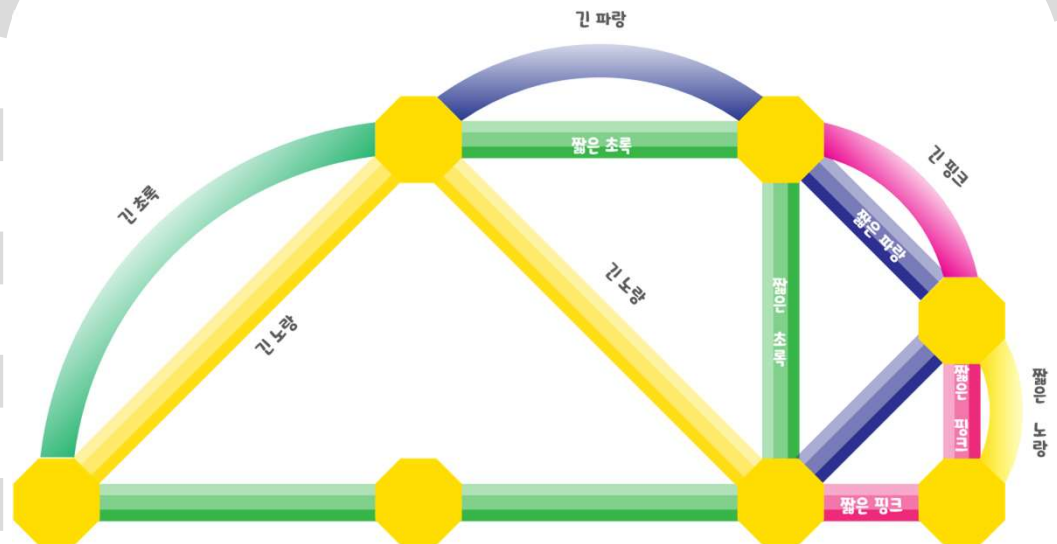

사용방법

Once you've got it in place, you can make the shape.
It's easy to make, but it takes a lot of brain power.

Depending on where you connect, you can create different shapes.

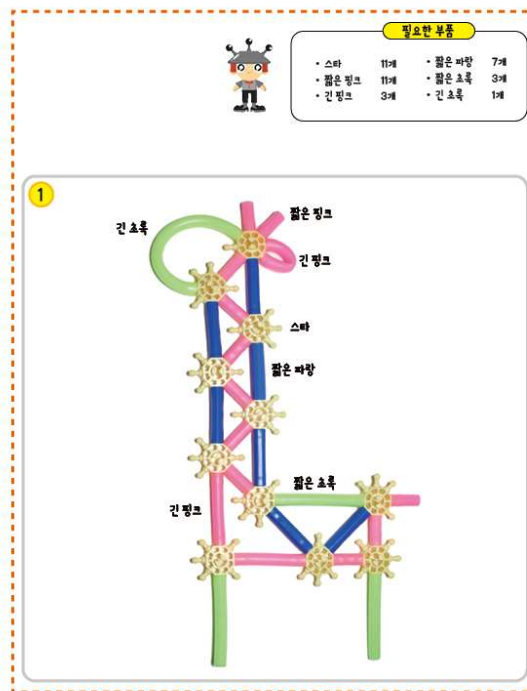

They have systematic proportions of length, allowing you to represent mathematical models such as fractal shapes.

가이드북

Each product comes with a guidebook to help you learn how to use it.

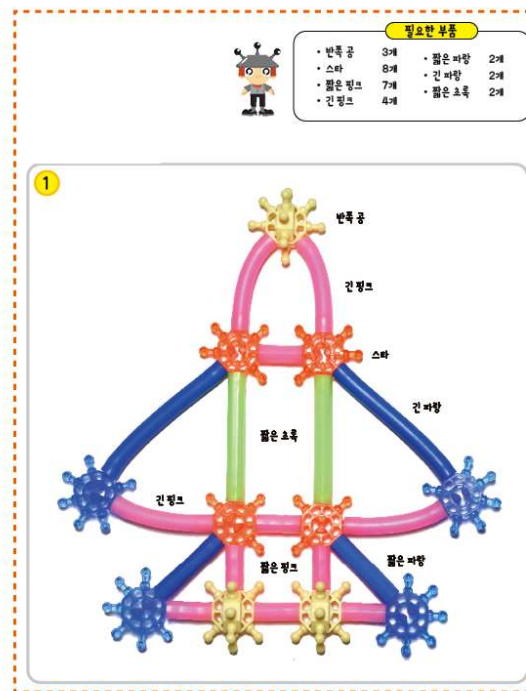

기린 만들기

Simplock

전투기 만들기 1

Simplock

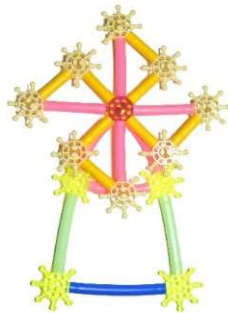

We provide a 'guidebook' to help kids learn how to use it by looking at example models!

제품 모델

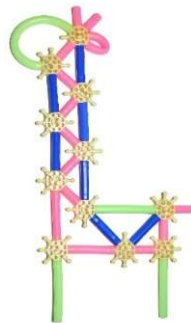

Shapes, animals, plants, man-made objects, and more. Hundreds to thousands of shapes can be created.

Motorbike

Windmills

Giraffe

Snowmobile

Truckmixer

Tree

Umbrella

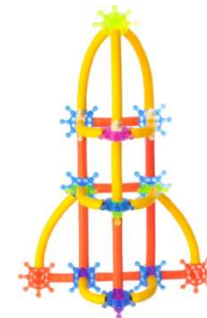

Turtles

Hot air balloon

Igloo

Space ships

Dragonfly

Applications

It can be used in childcare, after-school, community centres, academies, and anywhere else children are present.

Using it in the classroom

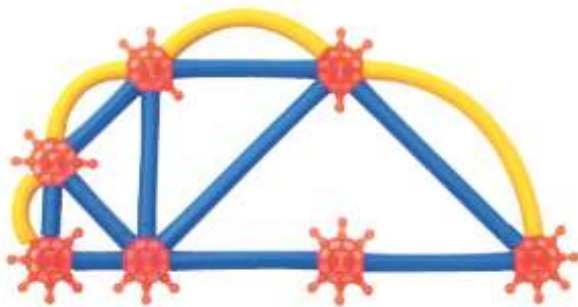

(<https://simplock.co.kr>)

1. You can download a variety of educational resources from our website (simplock.co.kr) to use in your classroom (primary school, kindergarten, coding resources, etc.)
2. Learn about topics, solve problems, and develop your creativity by making your own creations.
3. After learning about a topic, the teacher proposes a mission. Children can work alone or in teams to solve the problem.

Features

It is a Korean creative educational toy that has never been seen before.

1. KC, CE certified, safe for children to use.
2. 100% developed and produced in Korea.
3. It's the most free and creative block in the world.
4. It's easier to use than other blocks in the frame structure and can express a lot more.
5. Develop mathematical thinking skills (numbers, shapes, sequences, fractals)
6. It's fun to play alone and great for collaborative activities.

Products

This is a personal educational toy.
You can use it in your classroom.

키즈200

- Product : Kids200
- Use for : Kindergarten to lower elementary
- Number of parts : More than 200PCS
- Features : Easy and quick to make, 32 models guidebook
- Use it as a teaching material for elementary school students.
- Great for kindergarten graduation and elementary school gifts.

스쿨600

- Product : School 600
- Use for : Elementary school students
- Number of parts : 600PCS or more
- Features : Various types of parts, polyhedron, equilateral triangle representation, 52 model guidebooks
- Various applications are possible. It is a good gift for elementary school students.

스쿨5in1

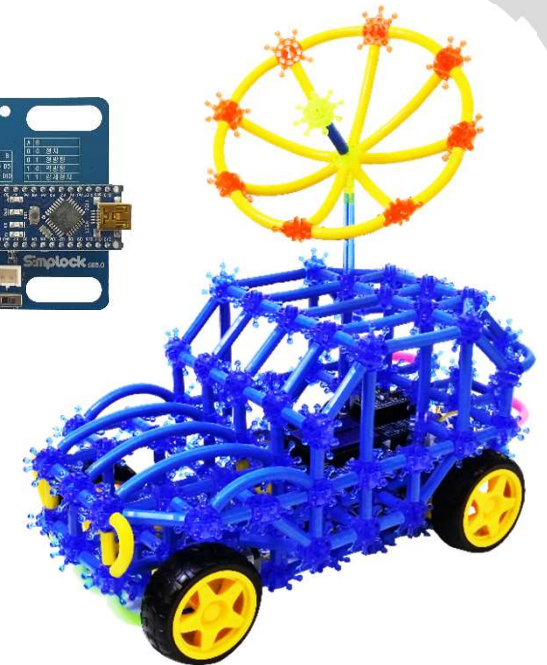

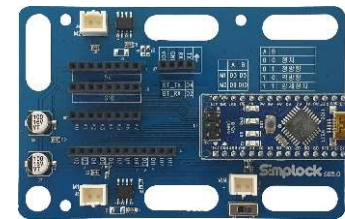

- Product : School5in1
- Use for : Elementary school students and above
- Number of parts : 480PCS or more
- Features : 5 types of engineering models using cogs (windmill, waterwheel, gear car, helicopter, chinook)
- Understand mechanical principles through modification and modification
- STEM teaching aid to enhance creativity.

Products

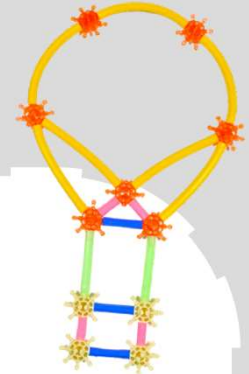

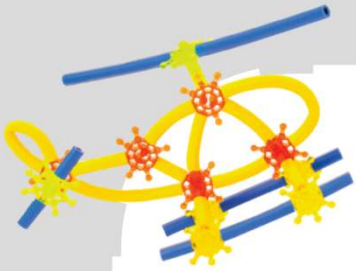

The School1200 is a group classroom and can be used by 4 people. When used in conjunction with SimpleBoard, it becomes a coding classroom.

- Product Name : School 1200 (Group Parish, 4 users/1Box)
- Use for : All primary grades
- Number of parts : 1200PCS or more
- Feature : All parts included. 52 models guidebook included

- Make coding education more fun with Simpleboard.
- It's very easy to use. See the information on the homepage.

The activities in SIMPLOCK are designed to naturally develop creativity and problem-solving skills.

Children can express their ideas, build cooperation and confidence through play. Let your imagination run wild and explore new worlds with SIMPLOCK.
