Key points of Jelly Spa Treatment

<Core points at a glance>

- A unique formulation change in which water turns back into jelly and jelly turns back into water.
- A jelly-like heating effect that maintains the temperature of foot bath water for 10 minutes.
- Manages dead skin cells without irritation with gluconolactone, a PHA hypoallergenic exfoliant.
- Moisturizes and nourishes the skin at once with eight natural plant oils and moisturizing enhancing ingredients.
- Main ingredient is EWG green grade raw material, made from 90% safe food grade raw materials.
- * Found to be non-irritating in skin clinical trials.

Jelly Spa Treatment

Innovative foot spa for healthy foot care

Jelly Spa Treatment is a foot spa product that is easier to use than a paraffin bath, providing both thermal steaming and moisturizing therapy at the same time.

A unique foot care item never seen before, it is used in warm water of 38 to 40 degrees.

The unique and soft texture of the jelly helps blood circulation and helps relieve fatigue. This product goes beyond simply changing the formulation, and you can feel the thermal steam effect as the jelly traps heat like paraffin therapy.

It also contains PHA gluconolactone ingredients, which soften the calluses on your hands and feet.

Try taking care of your healthy and beautiful hands and feet with this easy-to-use product.

"You can enjoy happiness and beauty together with just 15 minutes of leisure every day."

Jelly Spa treatment is a foot spa therapy that is completed through steps 1 and 2. This product helps recover from winter fatigue, improves blood circulation, and moisturizes the feet.

For those who suffer from cold hands and feet due to poor blood circulation in winter. Even if you use it just once, you will see that Jelly Spa's heat circulation effect helps you recover from fatigue and manage your body's immune system. It is a daily healing therapy item that you can feel.

It is more difficult to take care of your feet due to dryness in winter. Contains gluconolactone, which helps manage dead skin cells without irritation, and 11 moisturizing and nutritional ingredients. After using it, your feet can feel moisturized without being dry.

"Jelly Spa is a product that completes foot bath therapy through steps 1 and 2."

STEP 1 (Jelly Spa Powder 1) turns water into jelly formulation in 40 seconds. Not only does the formula change, but it also maintains heat and manages dead skin cells. You can enjoy the healing scent and soft touch of warm hot jelly for 7 to 10 minutes.

STEP 2 (Mineral Spa Powder 2) changes the jelly formulation to water in 20 seconds. Rather than simply changing the formulation to water, it lowers the thermal effect that was maintained and 100% Epsom salt, 8 types of vegetable oil, and 3 types of moisturizing substances nourish and moisturize the skin. The effect will be better if you massage while enjoying the mineral spa for 3 to 5 minutes.

ステップ1はゼリー波で7~10分間
温熱蒸気と低刺激角質ケア

ステップ2はミネラルスパで3~5分間
肌の保湿とミネラル栄養ケア

Jelly Spa Treatment's special two-stage treatment.

Enjoy the effects of each stage with a total of two foot bath stages!

STEP1. Jelly Powder

Water---->Jelly

- *Heat steaming

blood circulation

The water, cold, and disease are relieved and the blood is relieved.

☑ 항균항염

세균은 억제하고 냄새 제거

antibacterial anti-inflammatory

Inhibits bacteria and eliminates odor

FACT CHECK FOR BLOOD CIRCULATION
Temperature remains the same!
Find the answer in 10 minutes.

올바른 족욕 방법

피로 회복 및 각질제거를 위해서는
40도의 온도에 15분이상
족욕을 지속하는 것이 좋습니다.

족욕 효과 저하 원인

하지만 일반물은 온도가 빠르게 식어
체온보다 낮은 온도로
혈액순환의 도움이 저하 됩니다.

JellySpa
Treatment

온도를 가두는 기법

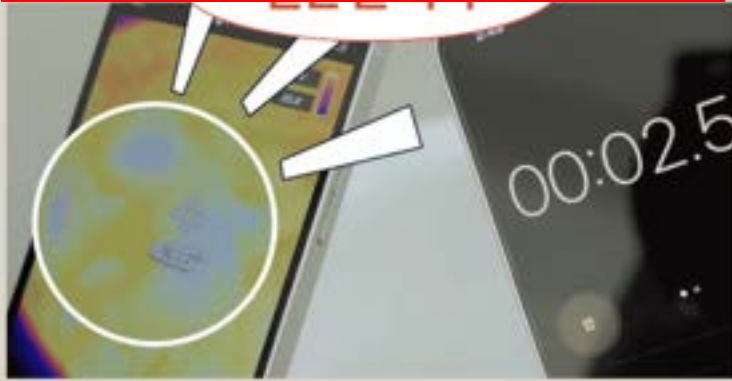

버블붕키는 물을 젤리형태로 변형시켜
온도를 가두게 도와주기 때문에
일반 족욕과 다른 경험을 할수있습니다.

효과적인 족욕 솔루션

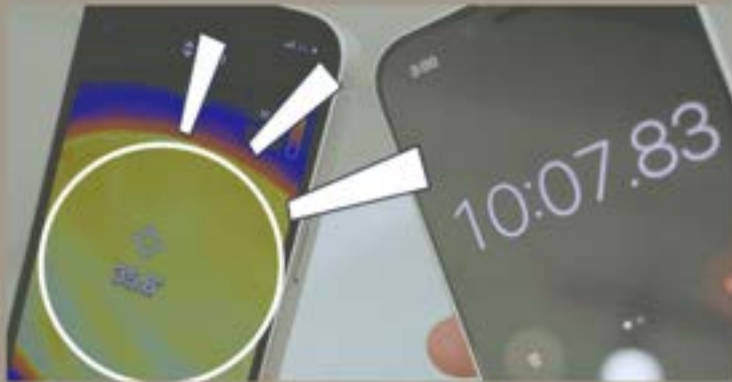

온도의 변화가 10분동안 변화가 없어
혈액순환을 유지하게 도와주어
효과적인 족욕을 즐길 수 있습니다.

When taking a foot bath
in regular water...

First foot bath temperature: 43.8 degrees

Temperature after 10 minutes
of foot bath: 35.6 degrees

After 10 minutes the
temperature dropped
by **8.2 degrees.**

Temperature change experiment between
water foot bath and jelly foot bath

Maintaining the water temperature
for 10 minutes.

Jelly Spa's core foot care strategy!

The jelly formulation of jelly spa treatment is
Unlike regular footbaths, it retains heat for more
than 10 minutes. It helps blood circulation by
maintaining a constant temperature.

Essential for blood purification!

Exfoliation relief

Even if you shave it, it's dead skin cells
that are embedded like calluses!
With blood circulation and hydration
by activating skin regeneration
Prevent the buildup of stratum corneum.

relief of swelling

I don't have blood circulation
If you have swollen or numb feet
He circulates blood through foot baths
Induce swelling relief and fatigue recovery.

Cold hands and feet

Cold hands and feet can make your
hands and feet more complex
To cause to become cloudy and discolored.
The blood circulation returns to the complexion
Keep your skin ideal.

antibacterial
anti-inflammatory

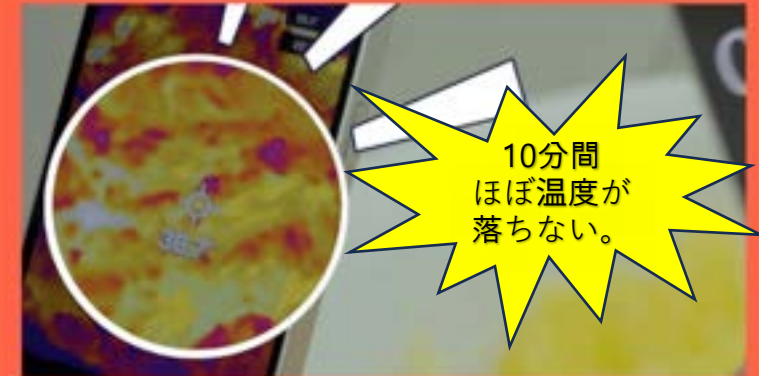

It's from NEEM OIL
With antibacterial and anti-inflammatory ingredients
with the inhibition of bacterial reproduction.
The aroma suppresses the smell of feet.

When taking a foot bath
with Jelly Spa...

First foot bath temperature: 38 degrees

10分間
ほぼ温度が
落ちない。

Temperature after 10 minutes
of foot bath: 39.5 degrees

After 10 minutes the
temperature dropped
by **0.2 degrees.**

“The formulation changes amazingly,
but is it safe for the skin?”

Jelly Spa Treatment has been determined to be non-irritating through skin hypoallergenic tests, and is safe as its main ingredients are EWG green grade ingredients and 90% are food grade ingredients.

and after use using an odor meter.

8 types of oil therapy to provide healthy nutrients

After the first foot bath

Refreshing for moisturizing

Full of vitamins with 8 types of oil!

Before exfoliating, create optimal condition

With three types of moisturizing
Finish with moist feet

Hyaluronic acid.

Natural moisturizing factors that exist naturally in the human body
It's one of them. It's 300 to 1000 times your weight
Attracts the corresponding moisture.

Trehalos.

Protects the peri-cellular membrane of cactus vitality
It prevents moisture evaporation.

Allantoin.

It softens the skin and soothes the skin
It is a safe fragrance ingredient.

Jelly Spa Treatment

Bubble Monkey is a product that you can always trust and use

It makes a safe product.

Jelly spa treatment

How to use

젤리스파사용법ASMR

1
STEP

GELLY SPA treatment is STEP 1 Jelly SPA Powder. It consists of STEP 2 mineral SPA powder.

2
STEP

STEP 1 Add Jelly Spa powder to 4 liters of warm water (38 to 40 degrees).

3
STEP

When the water turns into a completely soft, moist jelly, it makes you feel hot as if you are hot.

4
STEP

Enjoy a heat pack with soft hot jelly for 7 to 10 minutes. It massages dead skin cells and blood circulation.

5
STEP

After thoroughly enjoying Jelly Spa, STEP 2 Mineral Spa Add powder. The jelly formulation gradually turns into a liquid. It changes and the fever goes down.

6
STEP

Mineral spa is made with Epsom salt and eight moisturizing natural oils. It is created to provide moisture and nutrition to the skin.

7
STEP

After the mineral spa, lightly wash with a shower and use the remaining water. Just throw it in the washbasin or toilet for easy cleanup.
