Have you had **any inconveniences** with your food storage containers?

A cluttered cabinet full of mismatched containers, each bought for different ingredients and foods.

Loose-fitting lid and weak rubber seal result in poor sealing performance.

Containers that can't use with microwave or dishwasher

Containers easily deformed or cracked, Difficult to use for a long time

So, We, Sillymann suggest
the **Allway Airtight Food Container**

Easier storage and organization with **compatible lids for both tritan and heat-resistant glass container body**

**Compatible
Lids**

Platinum hollow-core silicone that blocks airflow and enhances sealing power

**Hollow-core
silicone**

From freezer to microwave, oven, and dishwasher — **Can be stored over a wide temperature range**

**All-in-One Heat & Cold
Resistant Container**

Detachable lid flaps that **won't break or wear out**

**Detachable
lid flaps**

*Tritan containers are not suitable for oven use.

Target consumers for Allway Tritan & Heat-Resistant Glass Food Container

Consumers who are highly interested in kitchen organization and space efficiency.

Recommended for consumers whose kitchens are cluttered with countless containers of different sizes and purposes, making it difficult to stay organized or fully utilize their storage space.

Consumer who are highly interested in food and side dish storage

Recommended for consumers who enjoy cooking and want to store a variety of side dishes and meals efficiently.

Consumers who live alone or with a small family and need smart storage solutions for limited space.

Recommended for consumers who use small refrigerators or have limited storage space and are seeking a more efficient way to organize various containers.

Consumers who prepare and pack meals with care for their loved ones

Recommended for those looking for leak-proof and portable containers to lovingly pack and send home-cooked side dishes to their children — or any loved one living away from home.

The Allway Airtight Food Container Solution — Completed **with Compatible Lids!**

3 Patent Pending – Allway Airtight Food Container

The contact surface of the silicone packing is angled to create a structure that allows the same lid to be used with containers made of different materials.

Patent Application No.: 10-2025-0038629

Title of Invention:

Dual-Purpose Packing for Glass and Plastic Airtight Food Containers, and Airtight Food Container Including the Same

02

Smarter storage!

Space-saving with no gaps

The precisely engineered lid flaps create a seamless fit, allowing for optimal use of space in your refrigerator and storage areas.

03

8mm hidden block for unmatched stability

The 8mm hidden block ensures stable stacking of containers and keeps them from toppling, even when tilted up to 20 degrees.

When organizing airtight food containers in a hurry during a busy day, **the 8mm-deep hidden block acts as a guide**, so the containers don't easily fall over.

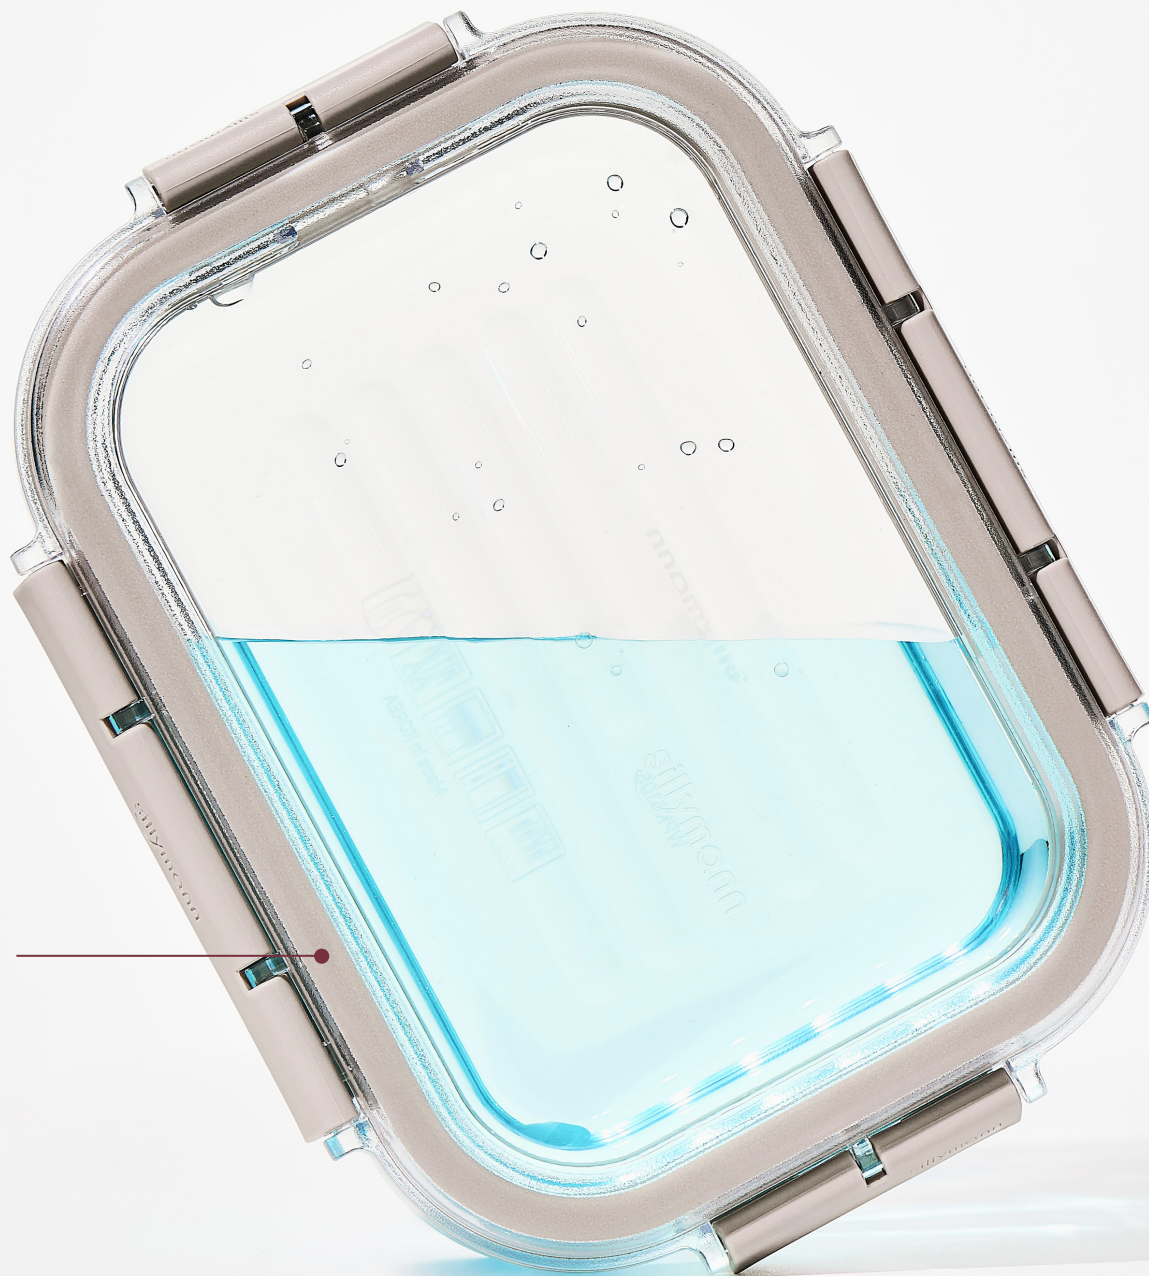

04

Perfect airtight sealing

Designed with four-sided locking tabs and a silicone gasket, the container ensures a strong seal that completely prevents leakage — keeping your fridge fresh and spill-free, even with soups or sauces

**Packing made from safe and
durable platinum silicone material**

05

Detachable four-sided locking lid flaps

The lid flaps are detachable, and the hinge section is resistant to cracking or wearing out from temperature changes, ensuring long-term durability.

06

Hollow-core platinum silicone

The hollow-core silicone structure enhances elasticity, blocking airflow when the lid is closed.

This improves adhesion and reinforces the airtight seal.

Tip!

The groove on the inside of the lid lets you easily detach the silicone packing for easy cleaning

Carefully considered, down to the smallest detail — Sillymann chooses only **platinum silicone**

Platinum silicone with platinum catalyst technology

Heat Resistance
-40°C to 250°C

Durable & Long-Lasting

Platinum catalyst is a type of expensive hardener that helps silicone cure into a solid form. Made from platinum, it is a high-end curing agent known for its superior durability. Silicone cured with a platinum catalyst does not break or crack easily and produces no odor after curing, making it ideal for eco-friendly products such as tableware.

07

Top-quality Tritan by Eastman

Tritan — a high-performance material developed by Eastman(USA) — this product is exceptionally strong, durable, and resistant to both heat and cold

*The transparent lid made of Tritan material allows you to check the contents and quantity inside the container without opening the lid.

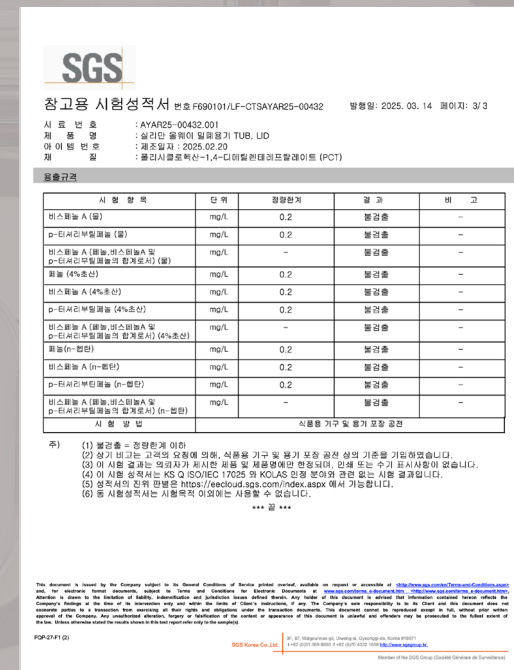

'Eastman' Tritan has been approved by international organizations such as the FDA (U.S. Food and Drug Administration), EFSA (European Food Safety Authority), HC (Health Canada), and JHOSPA (Japan Hygienic Olefin and Styrene Plastics Association), and is recognized as a safe material free from endocrine-disrupting chemicals(EDCs)

**Safe anytime,
anywhere – BPA FREE**

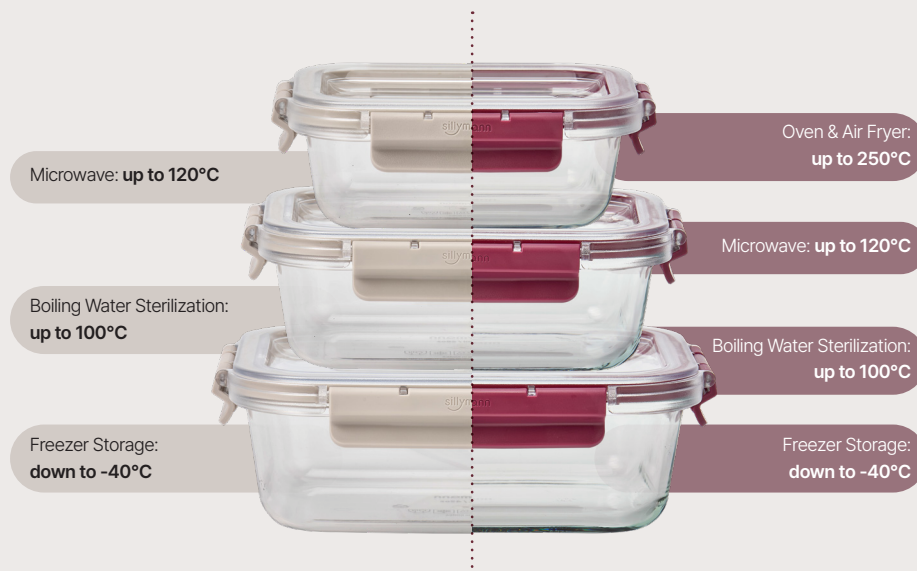

It is made from a safe material that contains no harmful substances, allowing you to use it anytime, anywhere with confidence and for your health.

09

It's OK with both low and high temperatures.

Made from a temperature-stable material, this product is safe to use not only in the refrigerator and freezer, but also in the microwave, for boiling water sterilization, in the dishwasher, oven, and even air fryer.

 Freezer Storage: -40°C

Oven & Air Fryer: 250°C 

*Oven & Air fryer use is limited to heat-resistant glass food containers only.
