

Company Profile

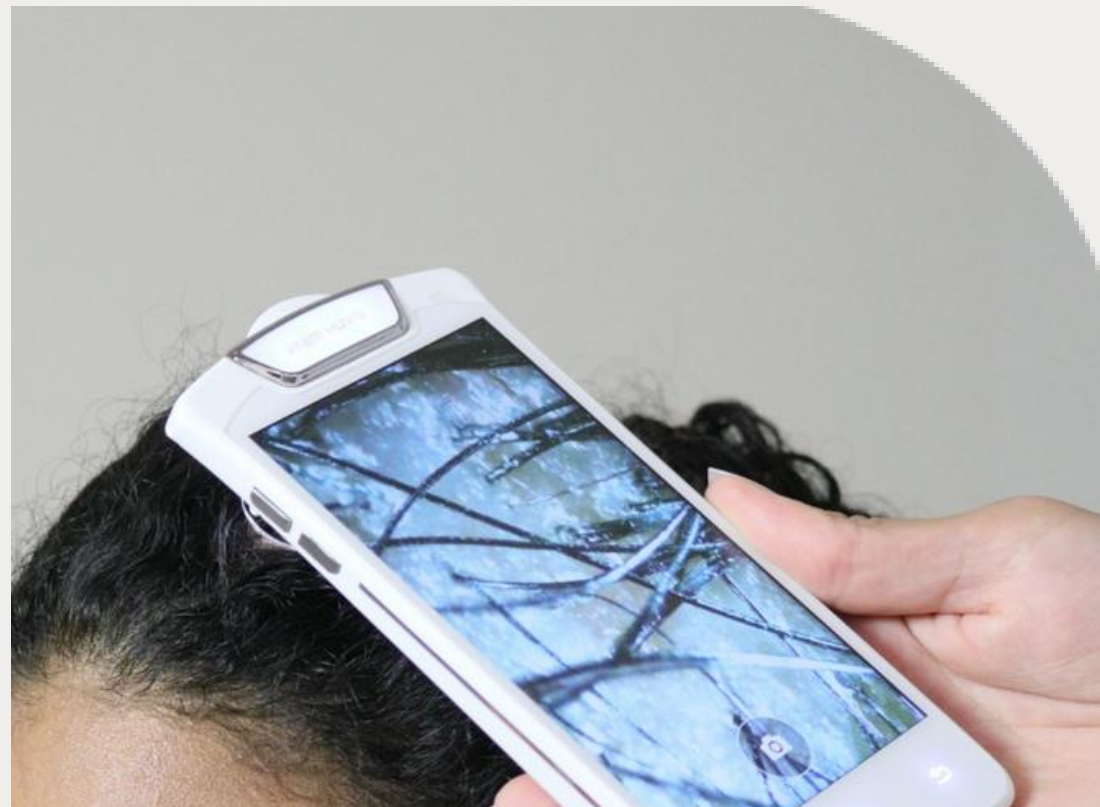

To make world's skin and hair healthy and beautiful

Bussiness Overview

Skin/Scalp/Hair Diagnostic Equipment Division

Exporting to over 70 countries, including partnerships with leading global cosmetics companies such as L'Oréal and P&G, L'Occitane, Caudalie, Beiersdorf.

Customized Cosmetics Division

Developing customized cosmetics to individual skin characteristics, ensuring even those with sensitive skin can use them with confidence.

Aram Huvis is a Global leader in
Skin & Scalp & Hair Diagnosis device

Pioneering Skin and Hair Analysis

Founded in 2002, Aram Huvis has dedicated over 20 years to advancing skin and hair health through innovative analysis devices.

Our commitment to research and development has established us as a global leader, exporting our systems to more than 70 countries and partnering with top-tier cosmetic companies like L'Oréal and P&G.

Collaborating with Seoul National University Bundang Hospital, and we aim to provide customized care that enhances individual skin and hair health.

About us

Collaboration Partner

Collaboration partner for skin and scalp analysis and the development of customized cosmetics, with advisory and inspection support from medical experts at **Seoul National University Bundang Hospital**.

Our Global Presence

Aram Huvis' skin and hair analysis systems are exported to **over 70 countries**, including collaborations with global top 5 cosmetic companies.

Device Division

Screen-Equipped Mobile Model	Series Name	For Skin	For Hair and Scalp	Function	Explanation
	 AISG (AI Scalp Grader)	Skin tone checker	  x60  CT Lens  x500	Scalp type, Hair density, Hair thickness, Hair loss type, Hair cuticle status, Color tone	AISG uses AI technology to analyze scalp conditions and provide customized scalp care solutions. With its high-resolution cameras and AI algorithms, it can precisely identify various scalp problems and recommend the right care for each individual.
	APM Pro	 APM Pro 100  x30	 APM Pro 200 (202,203,204)  X60  x200  x500	APM Pro-100: Moisture, Sebum, Pore, Melanin, Acne, Wrinkle, Sensitivity APM Pro-200 : Hair Loss Status, Scalp Status, Hair Density, Keratin of Scalp, Exposure of Scalp's vessel, Hair thickness, Hair Pore Status, Hair Cuticle Status	A premium product line featuring an independent operating system (Android) with an integrated display. The magnification can be customized through interchangeable lenses.
	ASM	 ASM 100  x30	 ASM 200 (202,203,204)  X60  X200  x500	ASM-100: Moisture, Sebum, Pore, Melanin, Acne, Wrinkle, Sensitivity ASM-200: Hair Loss Status, Scalp Status, Hair Density, Keratin of Scalp, Exposure of Scalp's vessel, Hair thickness, Hair Pore Status, Hair Cuticle Status	A premium product line designed for independent operation, featuring its own Android operating system and a built-in screen. Magnification is easily adjustable through interchangeable lenses. Enhanced with an upgraded system, a high-capacity battery, and a larger display, delivering an improved user experience.

	Model Name	For Skin	For Hair and Scalp	Functions	Explanation
Screenless Model	API	 API 100  x30	 API 202  x60	API - 100: Moisture, Sebum, Pore, Melanin, Acne, Wrinkle, Sensitivity API - 202: Hair Loss Status, Scalp Status, Hair Density, Keratin of Scalp, Exposure of Scalp's vessel, Hair Thickness, Hair Pore Status	Designed for wireless connectivity with smart devices, this portable model offers convenience and ease of use with a fixed magnification setting.
	ASL	 ASL 100  x30	 ASL 200 (202 / 203)  x60  x200	ASL - 100: Moisture, Sebum, Pore, Melanin, Acne, Wrinkle, Sensitivity ASL – 200: Hair Loss Status, Scalp Status, Hair Density, Keratin of Scalp, Exposure of Scalp's vessel, Hair Thickness, Hair Pore Status	Compatible with wireless connections to smart devices, this compact and portable model features a fixed magnification for effortless usability.
Fixed Model with Interchangeable Lens	ASW	 x1  x30 	 x60  x200  x500 	Skin: Moisture, Sebum, Pore, Melanin, Acne, Wrinkle, Sensitivity Hair : Hair Loss Status, Scalp Status, Hair Density, Keratin of Scalp, Exposure of Scalp's vessel, Hair Thickness, Hair Pore Status, Hair Cuticle Status	The ASW model supports both USB and wireless connections to smart devices. As part of a high-end product line, it features a fixed installation design with interchangeable lenses, enabling high magnification capabilities.

AISG (AI Scalp Grader)

This AI-powered system analyzes scalp conditions, identifies 10 scalp types and 7 symptoms, and provides customized care solutions.

Developed with Seoul National University Bundang Hospital, it offers customized shampoos and serums with a 93% satisfaction rate, improving scalp health by 50% in just four weeks.

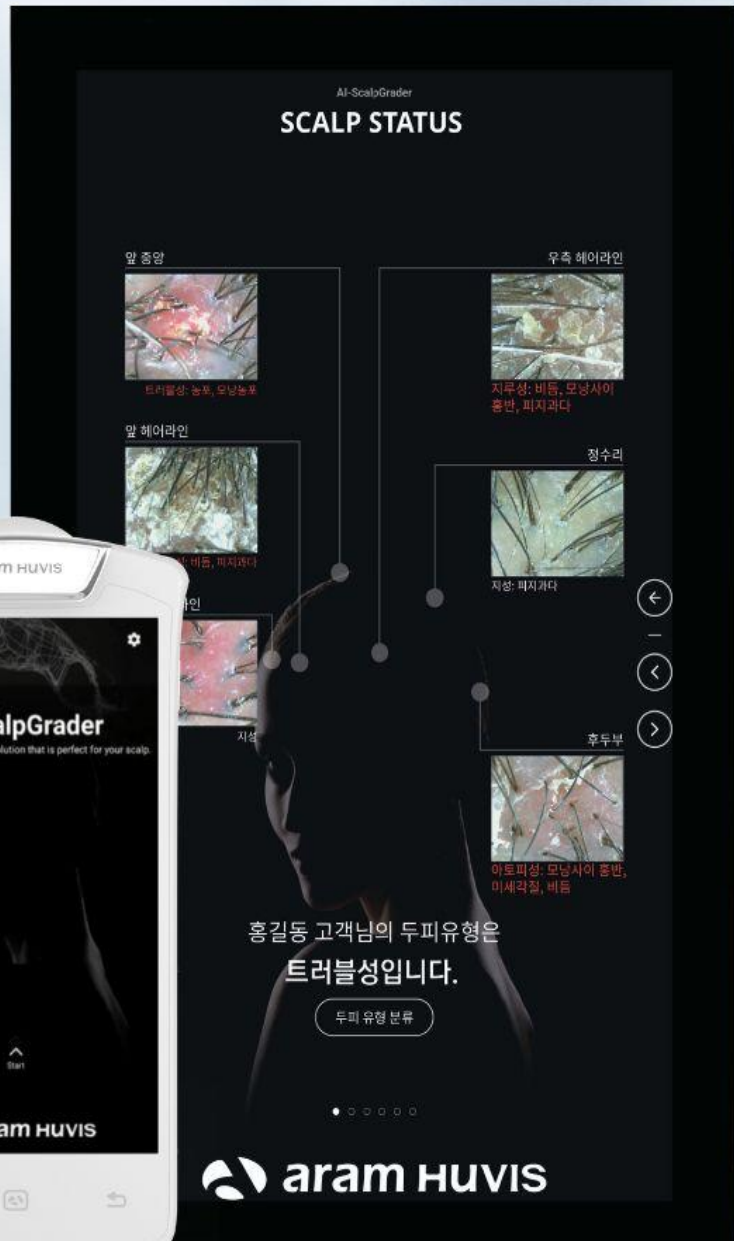

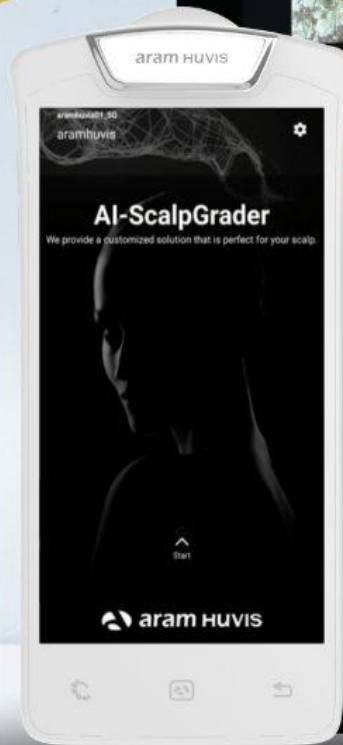

Ideal for salons and clinics and beauty brand.

AI algorithm

Version No: V1.0

책임연구자 소속: 분당서울대학교병원 피부과
책임연구자 이름: 나정임

연구 개요

연구제목	(국문) 두피 상태 진단 및 제품 추천 인공지능 알고리즘의 타당성 평가 연구 (영문) Feasibility assessment of deep learning-based scalp diagnosis and product recommendation AI algorithm
책임연구자	피부과 나정임 교수
연구비 지원기관	중소벤처기업부
연구 목적	두피 상태 진단 및 제품 추천 인공지능 알고리즘을 이용해, 맞춤 두피화장품을 제공하고, 사용 전후 두피 상태의 호전여부를 통해 알고리즘의 타당성을 평가한다. 추가로 인공지능 알고리즘 고도화를 위한 고품질 두피영상을 획득한다.
연구 설계	대조군이 없는 전후 비교 임상시험

Advancing Scalp Care with AI: Clinical Trial Insights

This clinical trial evaluates the feasibility of a deep learning-based AI algorithm for scalp diagnosis and personalized product recommendations.

Conducted under the guidance of Prof. Na Jeong Im from Seoul National University Hospital, the study involved 100 participants—far exceeding the usual scale of such trials.

Using **Lilai Pro**, the customized scalp shampoo and serum, the research highlights the algorithm's potential to revolutionize scalp care by delivering targeted solutions.

This breakthrough demonstrates the fusion of advanced AI technology with dermatological expertise to redefine scalp health management.

Prof Na Jeong Im

Department of Dermatology,

ASM (Aramo Signature Microscope)

Superior Imaging with 5.5" FHD Display

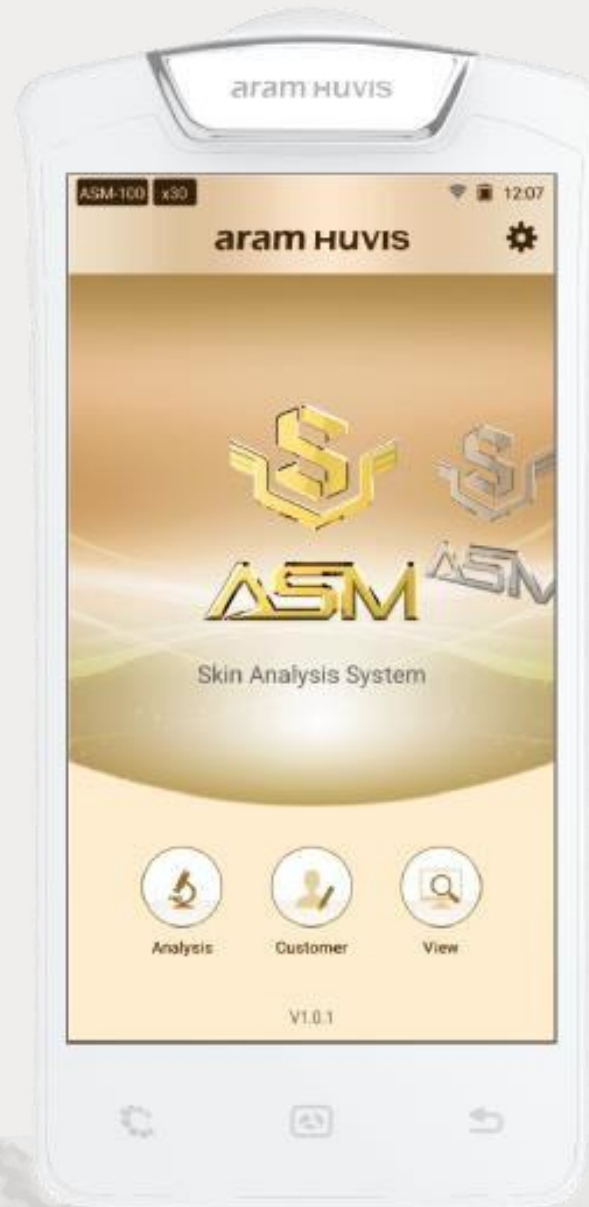

An all-in-one analyzer with a built-in screen, interchangeable lenses, and its own Operating System(Android) , enabling seamless mode switching for skin, scalp/hair, and tone analysis.

It offers simultaneous analysis with completion times of just 15-30 seconds per category and includes a screen mirroring function for enhanced versatility.

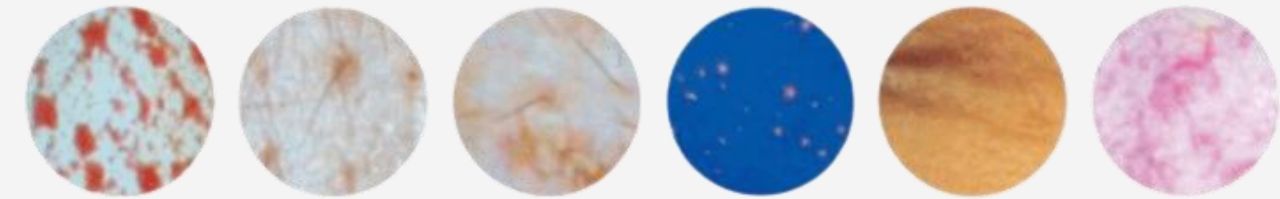

ASM 100

Skin Analyzer

Analysis List

Moisture & Elasticity / Sebum(U/T-ZONE) / Pore / Melanin / Acne
/ Wrinkle / Sensitivity

Key Features:

Exclusive High-Performance Optical Camera

Equipped with an X30 camera offering 30x magnification for detailed skin analysis.

Built-In Camera for Customer Management

Features an X1 camera with 1x magnification, ideal for managing customer profiles.

Seamless ASM App

Native ASM app for efficient and streamlined operation.

ASM 200

Hair & Scalp Analyzer

Analysis List

Hair Loss Status / Scalp Status / Hair Density / Keratin of Scalp
/ Exposure of Scalp's Vessel / Hair Thickness / Hair Pore Status /
Hair Cuticle Status

Key Features:

Ultra-High Performance Optical Camera for Scalp and Hair Analysis

Equipped with exclusive cameras offering 60x, 200x, and 500x magnifications for precise and detailed scalp and hair analysis.

Built-In Camera for Customer Management

Features an X1 camera with 1x magnification, ideal for managing customer profiles.

Seamless ASM App

Native ASM app for efficient and streamlined operation.

+

API (Aramo Portable scanner Integration)

Simple & Ergonomic Design

A simple, ergonomic device designed for professional use, it connects effortlessly to smart devices via Wi-Fi and is compatible with tablets and PC.

Equipped with a fixed magnification lens, it provides precise analysis of skin, scalp, and hair while ensuring versatility and ease of operation.

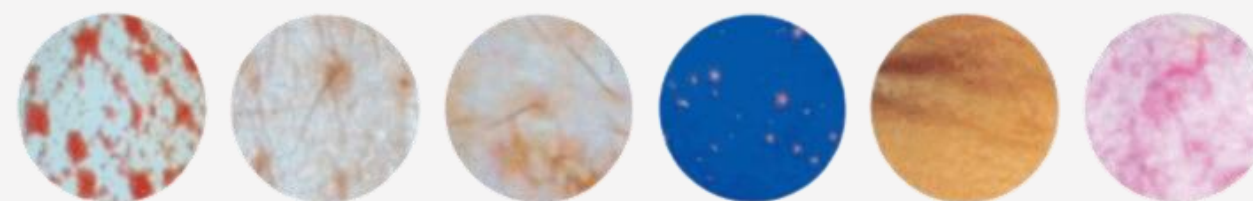

API 100

Skin Analyzer

Analysis List

Moisture & Elasticity / Sebum(U/T-ZONE) / Pore / Melanin /
Acne/ Wrinkle/ Sensitivity

Key Features:

Advanced Optical Camera for Skin Analysis

Equipped with a high-performance X30 camera offering 30x magnification for detailed and precise skin analysis.

Native App Integration (Solutionist)

Seamlessly connects to smart devices via Wi-Fi, ensuring convenience and ease of use.

API 202

Hair & Scalp Analyzer

Analysis List

Hair Loss Status / Scalp Status / Hair Density / Keratin of Scalp
/ Exposure of Scalp's Vessel / Hair Thickness / Hair Pore Status

Key Features:

Advanced Optical Camera for Scalp and Hair Analysis

Features a high-performance X60 camera with 60x magnification, providing detailed and accurate analysis of scalp and hair conditions.

Native App Integration

Easily connects to smart devices via Wi-Fi for seamless and convenient operation.

ASL (Aramo Smart Lite)

Small, simple, and smart—the most efficient choice

A compact and user-friendly device that connects effortlessly to smart devices via Wi-Fi, allowing for seamless skin, scalp, and hair analysis.

With switchable lenses for adaptable analysis modes, it offers simplicity, versatility, and smart compatibility with any device.

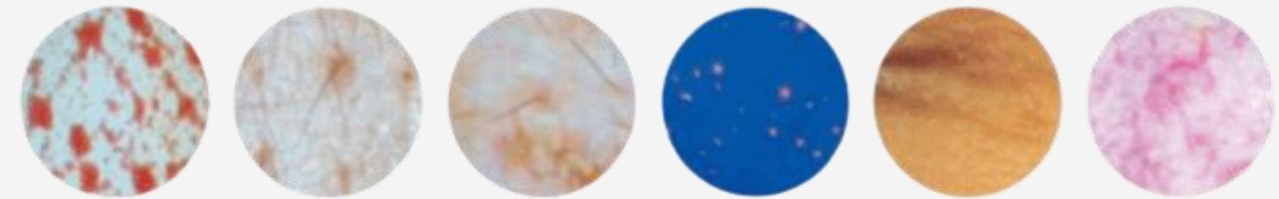

ASL 100

Skin Analyzer

Analysis List

Integrated Native App

Operates seamlessly with the Wizard app for streamlined functionality and ease of use.

Advance Skin & Hair Analysis System

Our Advance Skin & Hair analysis System transforms how you understand skin and hair health with our advanced analysis system. This comprehensive solution combines data collection, precise diagnostics, and personalized recommendations to deliver tailored care and expert insights for optimal results.

Data Collection

- Collect lifestyle details via questionnaires
- Capture skin & hair images using advanced devices

Precise Analysis

- Comprehensive Analysis of Skin and Hair Factors: Key elements like moisture, sebum, pores, and other critical factors are carefully analyzed for detailed diagnostic
- High-quality imaging for detailed diagnostics

Personalized Recommendations

- Tailored product prescriptions
- Custom solutions based on expert analysis
