

Design your confidence

Revite Shine PDRN 2.2ml

Experience transformative results in
elasticity, hydration, tone, and texture
with our scientifically-proven approach to skin renewal.

Revite®

JH Bio Korea

The Power of 3 Core Ingredients

PDRN (5mg/mL)

Tissue Regeneration

Induces fundamental regeneration of damaged skin tissue and promotes cellular growth, strengthening the skin's natural self-healing capabilities for lasting results.

Hyaluronic Acid (20mg/mL)

Intense Hydration

Replenishes moisture from deep within the dermis, providing immediate volume enhancement, superior hydration, and visible improvement in fine lines.

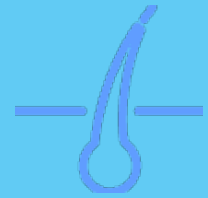

Niacinamide (1mg/mL)

Radiance Enhancement

Brightens and clarifies skin tone by inhibiting melanin production while reducing post-procedure inflammation and strengthening the protective skin barrier.

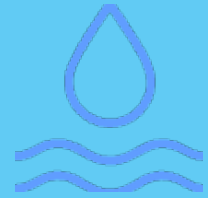

Transformative Key Benefits

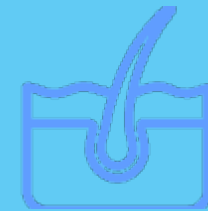

Enhanced Elasticity

Dramatically improves skin elasticity and reduces the appearance of fine lines through deep tissue regeneration and collagen stimulation.

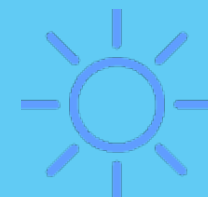

Deep Hydration

Delivers long-lasting moisture that penetrates multiple skin layers, creating plump, supple skin with improved barrier function.

Cellular Renewal

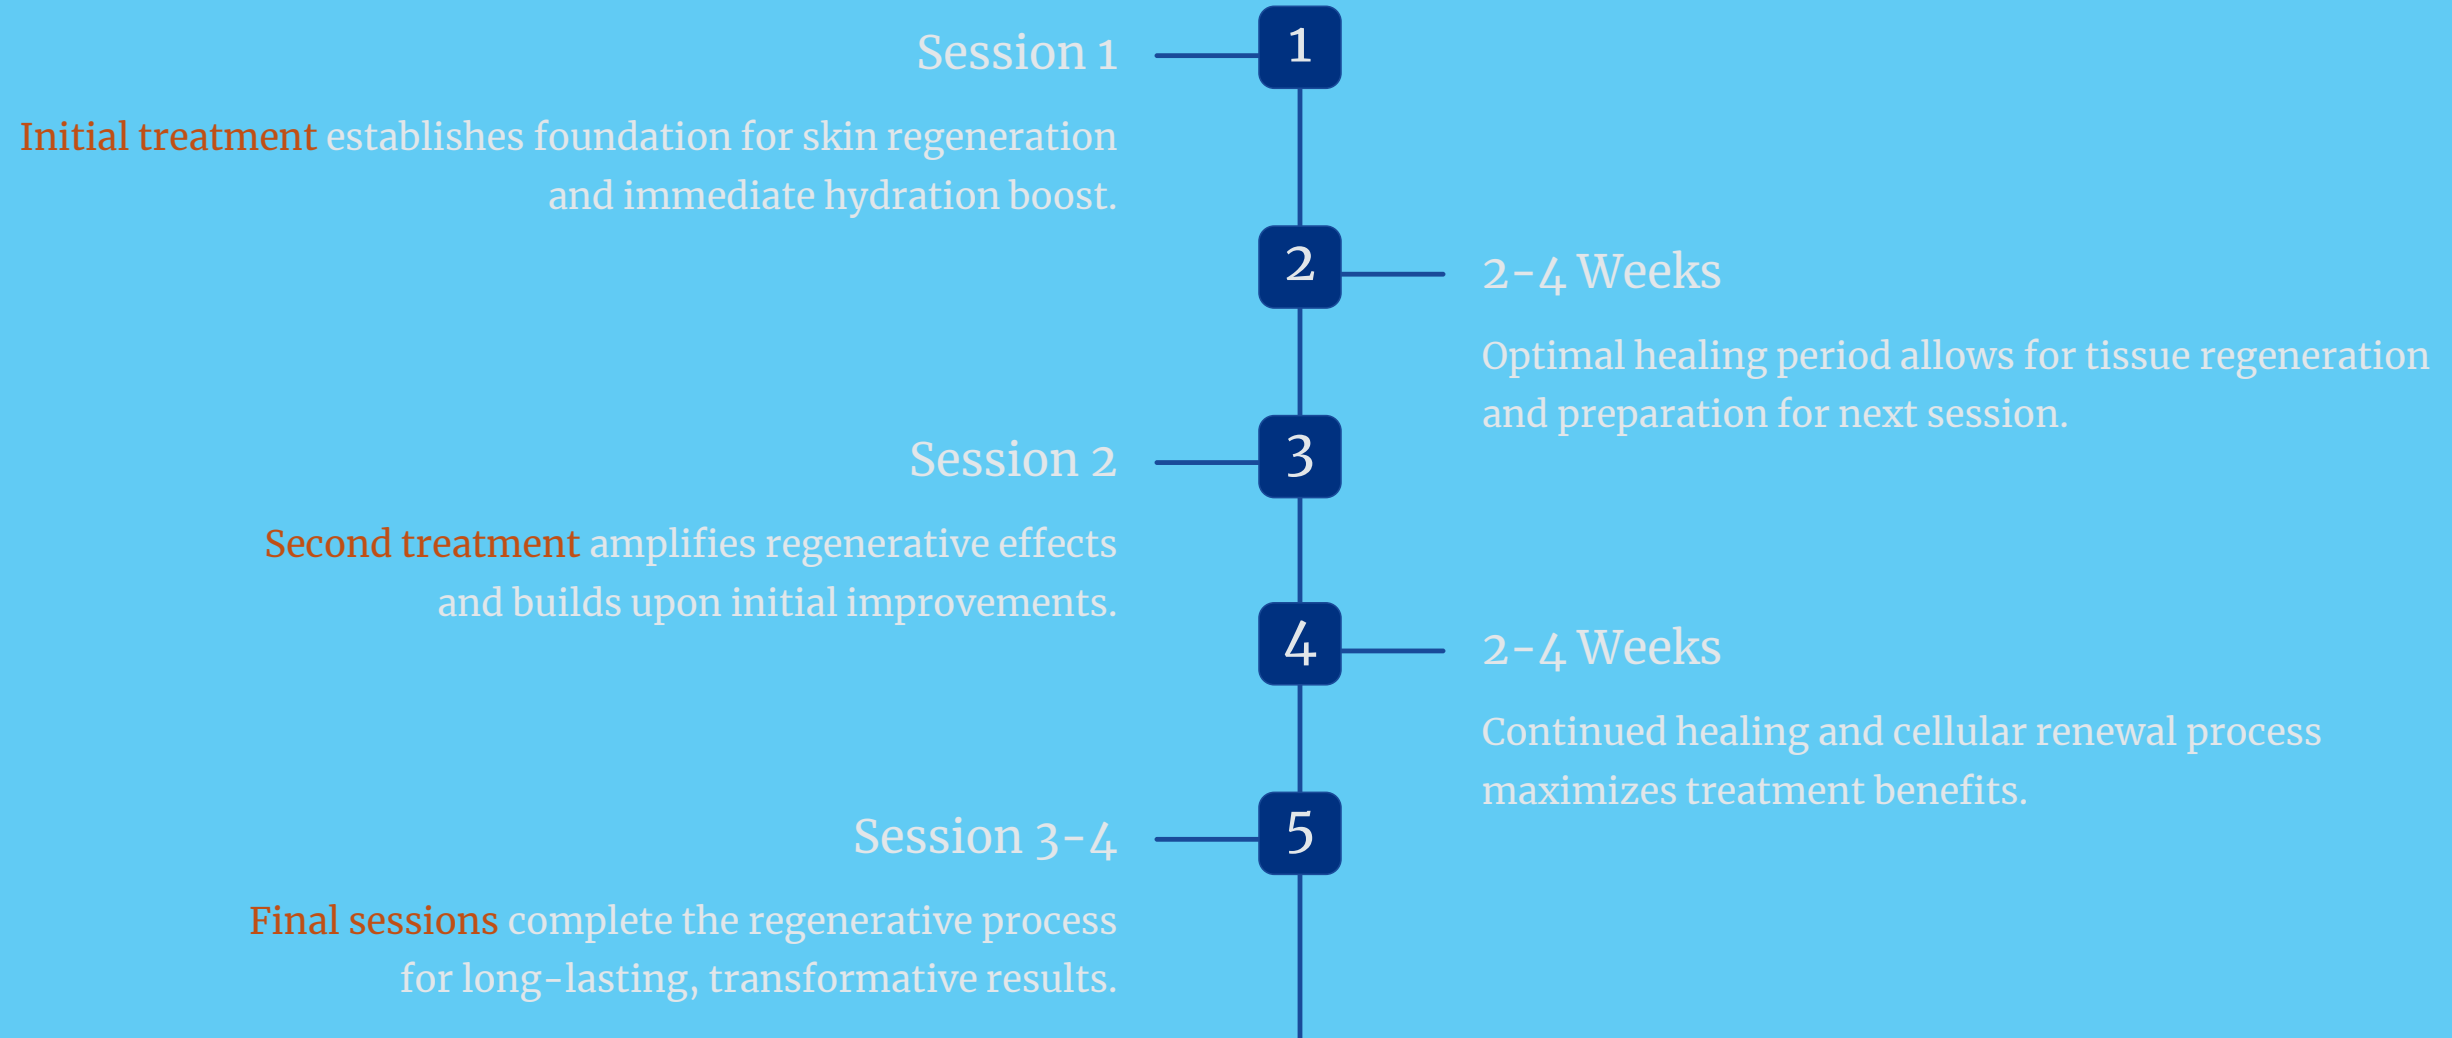

Promotes fundamental skin regeneration at the cellular level, repairing damage and restoring skin's natural vitality and resilience.

Radiant Complexion

Creates an even, luminous skin tone with enhanced radiance while reducing pigmentation irregularities and post-inflammatory marks.

Recommended Treatment Course

A total of 3-4 sessions provides optimal results with sustained skin improvement and patient satisfaction.
The follow-up treatment (1~2 sessions) after 6 months maintains the effects.

Injection Specifications

1

Skin Regeneration

Depth: 0.5mm – 1.5mm

Optimal depth for PDRN delivery and cellular regeneration activation in dermal layers.

2

Hydrolifting

Depth: 1.0mm – 2.0mm

Deeper placement for maximum volumization and structural hydration benefits.

3

Volume Per Point

Amount: 0.01 – 0.02 ml

Precise dosing ensures optimal product distribution without over-correction or waste.

Post-Treatment Care

01

Immediate Care (12 Hours)

Avoid washing face or applying makeup to allow optimal product integration and initial healing response.

02

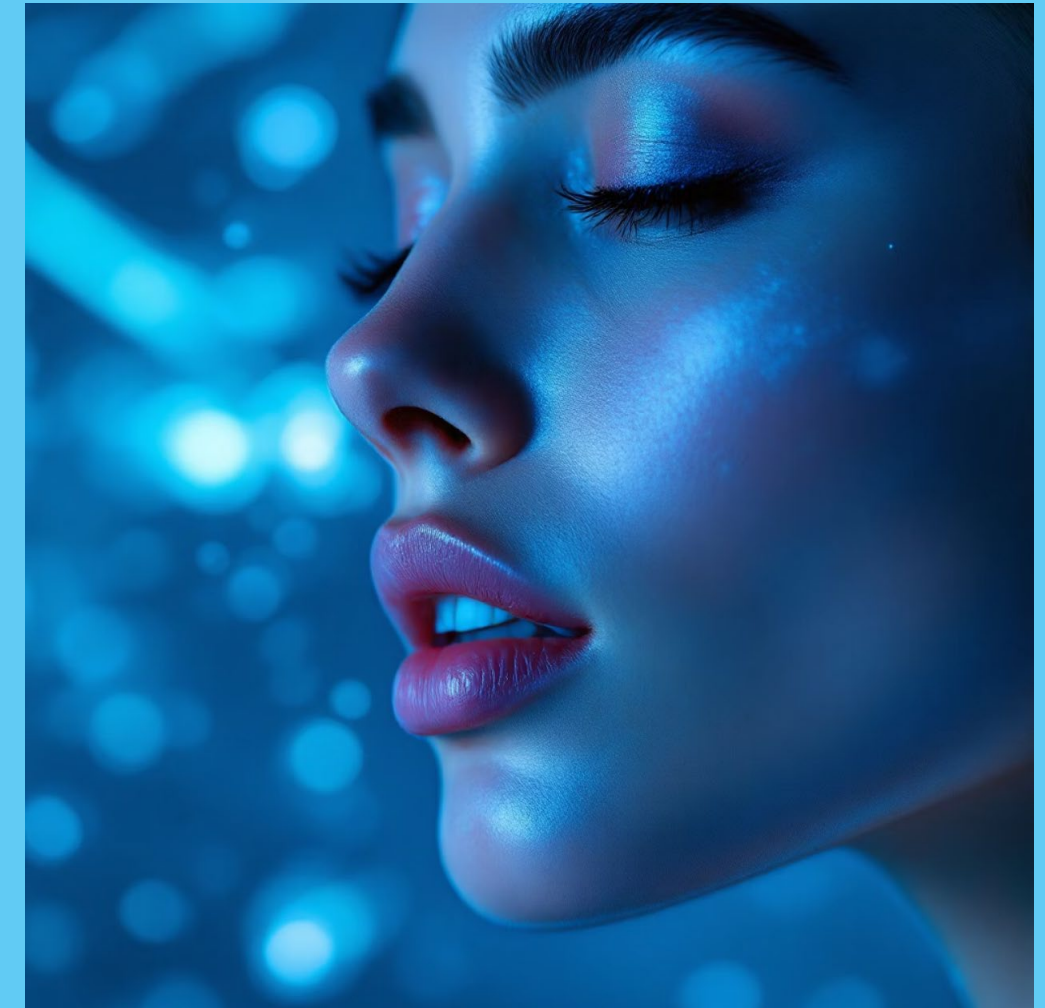

First Week Restrictions

Refrain from alcohol, smoking, saunas, and strenuous exercise to minimize inflammation and optimize results.

03

Ongoing Protection

Apply broad-spectrum sunscreen daily and maintain consistent moisturization for enhanced treatment longevity.
