

AG Patch

- + Intensive Care for Wrinkles and Dryness in the T-Zone & Cheek Area
- + Anti-aging effect
- + Moisturizing & Soothing effect
- + Easy to use thanks to its special design
- + No skin irritation

T-Zone

Cheek

FEATURES

T-ZONE AG & CHEEK AG PATCH are specifically designed for the intensive care of T-zone & Cheek's wrinkles, each. The areas acquire wrinkles and fine lines due to aging and dryness. The innovative ingredients of PATCHes can help restore elasticity and offers an antioxidant effect. Due to the hydrogel technology of the patch, it provides moisturizing and cooling effects to the affected area. It fits well on the skin and convenient to apply.

INGREDIENTS

• Sodium Hyaluronate ,Hydrolyzed Collagen , Bioflavonoids, Tocopheryl Acetate

INSTRUCTION FOR USE

1. Clean and dry the area of application.
2. Cut to open the pouch and take out the T-Zone AG or Cheek AG patch.
3. Peel off the protective film and attach the patch to T-Zone area and gently press the edge for better adhesion.
4. Leave the patch for a minimum of 4 hours for it to be effective.

(The patch can be used for a maximum of 8 hours. It is recommended to use overnight for the continuous absorption of ingredients.)

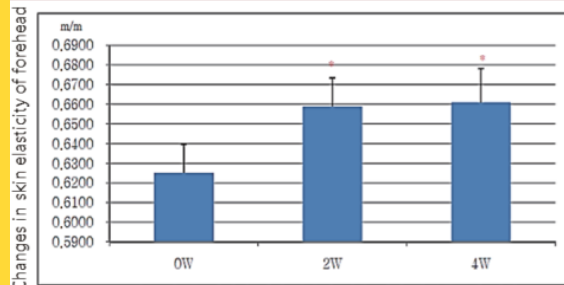

CLINICAL STUDY

-Subjects: 20 healthy adult female subjects aged 30~49

-Sample use period: For 4 weeks (Once / day, 1 hour per time), Use every other day

	Before using the product (0W)	2 weeks after using the product (2W)	4 weeks after using the product (4W)
R2	0.6252±0.0651	0.6589±0.0648	0.6610±0.0770
p-value†	/	0.002	0.015^
Change rate (%)	/	5.39%	5.73%

When compared with before using the test product, skin elasticity R2 (Gross elasticity) value was increased (improved) statistically significantly 2 weeks, 4 weeks after using the product ($p < 0.05$).

*This clinical study is performed by Kyung Hee University Skin Biotechnology Center.
