DongHae SaemMul Co.,Ltd

Donghae Yakcheongol

# JIJANGSOO

## Water is life.

No good water in Korea?
Yes, in Korea, we have JIJANGSOO.

# Company History

## 2001~2005

- Established DongHae Saemmul Co., Ltd.
- Quality verification of rotational electromagnetic waves by Ajou University (Meridian circulation driving force, metabolism promotion ability, rotational electromagnetic waves)
- Acquired U.S. FDA Food Facility Registration Form
- Clinical trial for atopic dermatitis at Seoul National University College of Medicine: Positive results (Effect of JIJANGSOO intake on atopic dermatitis)
- Started exporting to Japan
- Started exporting to China (China export declaration ceremony)

Started exporting to China
(China export declaration ceremony)

Started exporting to Japan

## 2006~2023

- Participated in FOODEX Osaka, Japan
- Acquired ISO 14001/ISO 9001 certification
- Featured in a special broadcast by China CCTV 3.15 on the top five healthy drinking water brands
- Participated in the Daegu-Gyeongbuk Best Products Fair (BEST FAIR 2007)
- Participated in Seoul International Food Industry Exhibition
- Participated in Food Week Korea
- Participated in Daegu International Food Expo
- Participated in Busan International Food Expo exhibition
- OEM production of drinking water "Curing" for Yuyu Pharma
- Featured on MBN's Heavenly Leak"
- Featured on Yonhap News TV's "Trends Here and Now"
- Acquired Korean Halal certification

Participated in FOODEX Osaka, Japan

Participated in SEOUL FOOD

Featured on MBN's Heavenly Leak"

Aired on a program in CCTV, China

Participated in FOOD WEEK KOREA

Featured on Yonhap News TV's "Trends Here and Now"

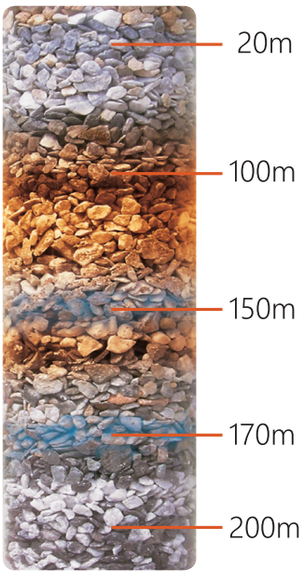
Overview of Donghae Saemmul

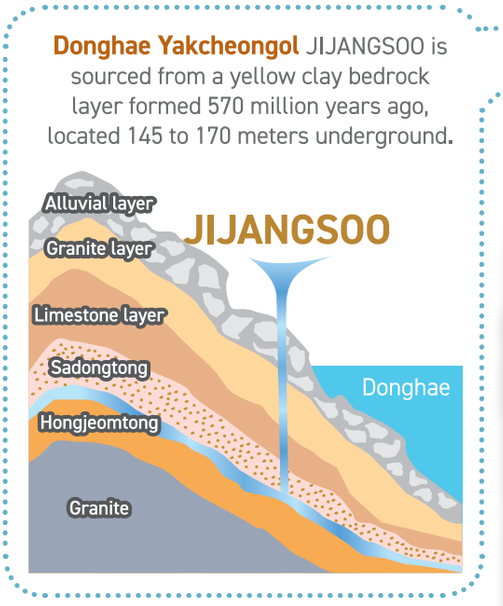
# What is Donghae Yakcheongol JIJANGSOO?

This water is naturally formed from a yellow clay bedrock layer that was created 570 million years ago. Because it has been naturally formed over a long period, it differs from other artificially made JIJANGSOO.

Donghae Yakcheongol JIJANGSOO appears clear, but it is a suspension in which fine yellow clay particles are dispersed in the water. The depth at which the water is sourced is safe and less affected by underground heavy metals.

Donghae Yakcheongol JIJANGSOO flows along the bedrock layer, becoming rich in minerals such as calcium (Ca), magnesium (Mg), sodium (Na), and silicon (Si). As it passes through the yellow clay bedrock, it contains dissolved yellow clay particles at a nano-sized scale.





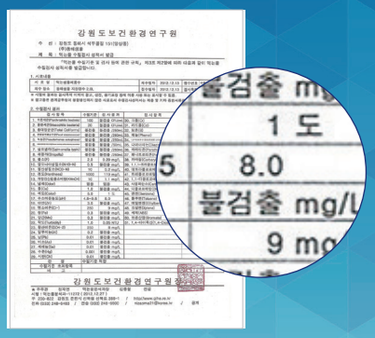
## *Water is alive.*

## It is said that water holds feelings.

With this belief, Donghae Mineral Water brings you clean and clear water filled with care and sincerity.
With this belief, Donghae Saemmul brings you clean and clear water filled with care and sincerity.

# Alkaline water, JIJANGSOO

JIJANGSOO, with a pH of 8.0, is an alkaline water that helps remove active oxygen and is highly effective in relieving hangovers.



## JIJANGSOO is rich in minerals (hardness 120).

| | | |
|---|---|---|
| Calcium | 35.06 | Central to the formation of bones and teeth, and the activation of hormones and biological enzymes |
| Magnesium | 8.15 | Key mineral in bone formation, muscle contraction, and cell metabolism |
| Potassium | 0.85 | Maintains normal osmotic pressure, water balance, and preservation of cellular fluid |
| Sodium | 7.17 | Regulates the acid and alkaline balance of body fluids |
| Sulfate Ion | 12 | Assists the liver (detoxification), stimulates the gallbladder, and aids digestion |
| Vanadium | 0.00057 | Known for diabetes treatment, inhibits cholesterol activity, and involved in growth and reproduction |
| Silicon Dioxide | 8.0 | Helps reduce the risk of dementia and heart disease |
| Silicon | 4.7 | Relieves arteriosclerosis, forms collagen to reduce skin aging and wrinkles, delaying aging |
| Bicarbonate | 134.0 | Neutralizes the body to maintain pH balance and helps eliminate body waste |
| Molybdenum | 0.0002 | Acts as a coenzyme catalyzing important chemical changes in the carbon, nitrogen, and sulfur cycles |
| Total Dissolved Solids | 156.0 | Indicates the presence of various health-benefiting minerals |

(Test report from Institute of Health and Environment & Mineral content: mg/L)

# Properties of Yellow Clay

Since JIJANGSOO contains fine yellow clay particles, understanding the properties of yellow clay can help you understand the benefits of JIJANGSOO. Yellow clay has four major characteristics:

**Ion Exchange Properties**
When yellow clay is added to a solution containing cations, an exchange occurs between the cations within the yellow clay and those in the solution.

**Adsorption Properties**
Yellow clay has the property of adsorbing and coagulating nutrients and microplankton in seawater, which causes harmful algae to sink to the bottom of the sea and die.

**Emission of Far-Infrared Rays**
Drinking JIJANGSOO releases far-infrared rays inside the body, promoting metabolic functions and activating blood circulation.

**Active Microbial Functions**
Enzymes and microorganisms in the soil play a crucial role in the ecological material cycle, including detoxification, decomposition of organic matter, nutrient supply, and purification.

Iwate Prefecture

# Use of JIJANGSOO

## When Cooking Food

Since 75% of the human body weight is composed of water, changing the everyday water used for making soup or rice can lead to improvements in physical constitution.

## When Preparing Herbal Medicine

Using JIJANGSOO to prepare herbal medicine enhances the extraction effect of the medicine due to JIJANGSOO's adsorption properties, and helps retain the medicinal ingredients.

## When Making Tea

Traditional tea and yellow clay JIJANGSOO, being natural substances, harmonize well together, enhancing the flavor and aroma of the tea.

## When Washing Fruits

Due to JIJANGSOO's adsorption properties, it is much safer and more effective than chemical detergents for removing pesticide residues from fruits.

## When Cleansing Face and Moisturizing Skin

Washing your face with JIJANGSOO or spraying it on rough skin helps keep the skin moist. Spraying JIJANGSOO on your face before bed can result in better makeup application in the morning.

## For Healthy Fish Farming

When fish scales fall off or they get injured during farming, adding yellow clay to the water can help in their regeneration.

# JIJANGSOO Mentioned in Ancient Texts (1)

## JIJANGSOO

**Refers to yellow earth water. Its nature is cool and non-toxic. It relieves the distress caused by various intoxications. In the mountains, poisonous mushrooms exist, consuming which unknowingly can endanger life. Also, eating mountain tree mushrooms can lead to uncontrollable laughter followed by death. In such cases, only drinking this water can cure one; other medicines cannot save them.**

**– Dongui Bogam –**

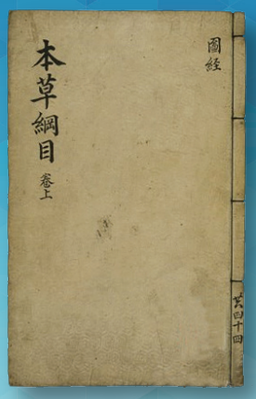
▶ **Sinnongbonchogyeong** (Identification on Herbal Medicine)

It tastes sweet, has a gentle energy, soothes the stomach, harmonizes, stops bleeding, and removes all toxins.

▶ **Royal Yangmyeongsul**

It prophesies that in the future, it will play a significant role in saving weak people of the world.

# JIJANGSOO Mentioned in Ancient Texts (2)



[Explanation] In places where there is yellow earth, dig three pits about 1 meter deep. Pour in newly sourced water, stir it, then wait a bit and drink the clear water on top. Ancients called this 'Jijang' or 'Tojang'.

[Taste] Sweet and cool, non-toxic.
Main effects - Resolves all kinds of poisoning anxieties. Detoxifies all animal and vegetable toxins, manages digestive disorders and fevers.

**– Boncho Gangmok –**

### ▶ Uirimchanyo

Balances yin and yang, detoxifies all toxins, removes stagnant blood, and heals wounds.

### ▶ Boncho Jaeshin

Stimulates appetite, strengthens the abdomen, promotes digestion, removes dampness, and fortifies the digestive system.

# Manufacturing Process

Our manufacturing process includes a purified water line and PET production line.
At DongHae Saemmul, we rigorously manage and ensure quality to produce Donghae Yakcheongol JIJANGSOO.

## Purified Water Line

Raw Water Storage Tank → Activated Carbon Filtration → Treated Water Storage Tank → 1st Filtration → UV Sterilization → 2nd Filtration → UV Sterilization → 3nd Filtration → UV Sterilization

## PET Production Line

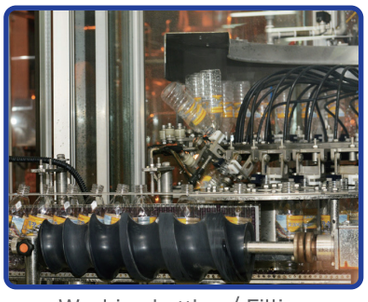
Bottle Insertion → Washing empty bottles → Filling (Product Injection) → Capping → Production Date Labeling → Inspection Bottle → Packaging → Palletizer → Shipping

Raw Water Storage Tank

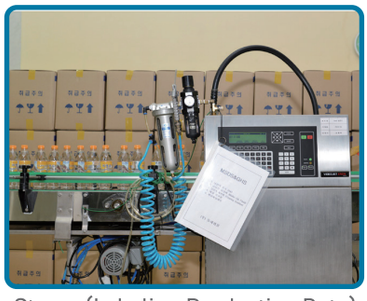
Activated Carbon Filtration

Treated Water Storage Tank

High-precision filter



Washing bottles / Filling



Stamp (Labeling Production Date)

Inspection Bottle

Packaging – Wrapping Section

Palletizer

# Water is the Essence of Immunity.

Immunity is the vital force that sustains organisms, in other words, it can be expressed as homeostasis. A decline in this vital force or homeostasis indicates a weakening of immunity. Maintaining this state at normal levels equates to possessing normal immunity.

Thus, robust vitality enables one to fend off various internal and external pathological agents such as bacteria, viruses, parasites, and others. In essence, good health signifies possessing the robust vitality necessary for life, which is precisely what immunity entails.

The body's vitality, essential for life, is directly supported by its water component. Therefore, stating that water is life and the cornerstone of immunity is not an overstatement.

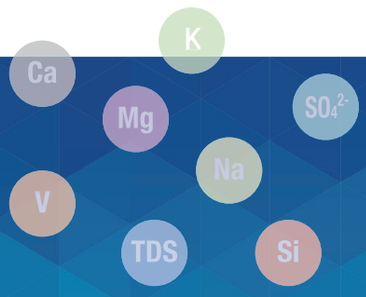
By acknowledging this fact collectively, we aspire to attain permanent liberation from the fear of diseases.

Professor Heo Mindo
Department of Fisheries Science and Biomedical Science, College of Fisheries Sciences, Pukyong National University

## Drinking good water consistently

- Improves digestion, alleviating issues like constipation.
- Enhances metabolism and strengthens overall body condition.
- Can improve or even cure skin conditions like atopic dermatitis.
- Reduces the effects of overindulgence, such as hangovers and bad breath.
- Alleviates menstrual pain and irregularities in women.
- During pregnancy, it leads to giving birth to a healthier baby.
- After childbirth, it promotes good lactation and maintains good quality.
- Leads to moisturized and smooth skin.

···· There are many other benefits as well.



### Criteria for evaluating good water - Minerals

Consistently consuming water containing a balanced variety of minerals can help rebalance the body's mineral levels.
Donghae Yakcheongol JIJANGSOO, sourced from yellow clay layers, contains a harmonious blend of various minerals.

# Yakcheongol's Origin

**The term "Yakcheon" means a spring where medicinal water flows, indicating water that has healing properties.**

During the Goryeo Dynasty, it is said that a scholar who suffered from an illness drank water from this place and afterward attained a high government position in Seoul. From that time on, this well was called "Yakcheon," and the village was also named Yakcheong-dong.

Later, Scholar Nam Guman, who lived in exile at this place, tasted the water from Yakcheongol and found its taste pleasing, feeling it resonated with his principles. As a result, he decided to stay in this location.

In honor of Scholar Nam Guman's profound learning and virtue, Yakcheongsa (Yakcheong Temple) was established, where his portrait is enshrined and annual memorial services are held.
